

2004 Annual Report

Dr. Paul E. Whitesell
Superintendent

100 North Senate Avenue, Indianapolis, IN 46204-2259

Office of Superintendent
Paul E. Whitesell, Ph.D.

August 2005

TO: Honorable Mitchell E. Daniels, Jr.
Governor

FROM: Paul E. Whitesell, Superintendent
Indiana State Police Department

SUBJECT: Annual Report

Contained in the following pages is the 2004 Indiana State Police Annual Report. As you review this report, you will see where our department stood at the beginning of the new administration. It reflects the command and activities during calendar year 2004.

We have personnel, both enforcement and civilian, who are committed to providing first-class public safety services to citizens and visitors to the state. Our goal is to improve upon these facts in order to create a premier police agency, one of which all Hoosiers can be proud.

Respectfully submitted,

Paul E. Whitesell
Superintendent

Vision

The Indiana State Police will be the premier law enforcement agency in the country. We will be guided by three immutable values: **I**ntegrity, **S**ervice and **P**rofessionalism. In order to foster respect, creativity, teamwork and diversity, individual employees will be given the authority, latitude and responsibility associated with an empowered work force. Problem solving, crime reduction, traffic safety and police service will be approached with an unwavering consistency - - 100 percent effort, 100 percent of the time. The best available technology will be utilized in accomplishing our mission. State and federal laws will be enforced fairly, honestly and impartially. We will communicate with the public, other governmental agencies and among ourselves in an open, candid, respectful and professional manner.

Goals

The department will provide the best in **quality service** to earn the highest respect and confidence of our customers.

The department will provide **public service** through individual attention with integrity and professionalism.

Each district of the department will identify and target for each district the most significant **criminal activities** and work diligently toward addressing them.

Each district of the department will identify and target for each district the most significant **traffic-related problems** and work diligently toward addressing them.

The department will **empower all employees** to be leaders in their area of responsibility through 100 percent effort, 100 percent of the time to promote the department's mission.

The department will ensure that employees adhere to established **professional standards**.

The department will **treat our customers and colleagues in a fair and equitable manner** without regard to race, gender, religion or national origin.

The department will develop **partnerships** to reduce crime, make roadways safe and provide assistance to the public.

The department will **manage resources** to focus on those activities having the greatest impact on department priorities:

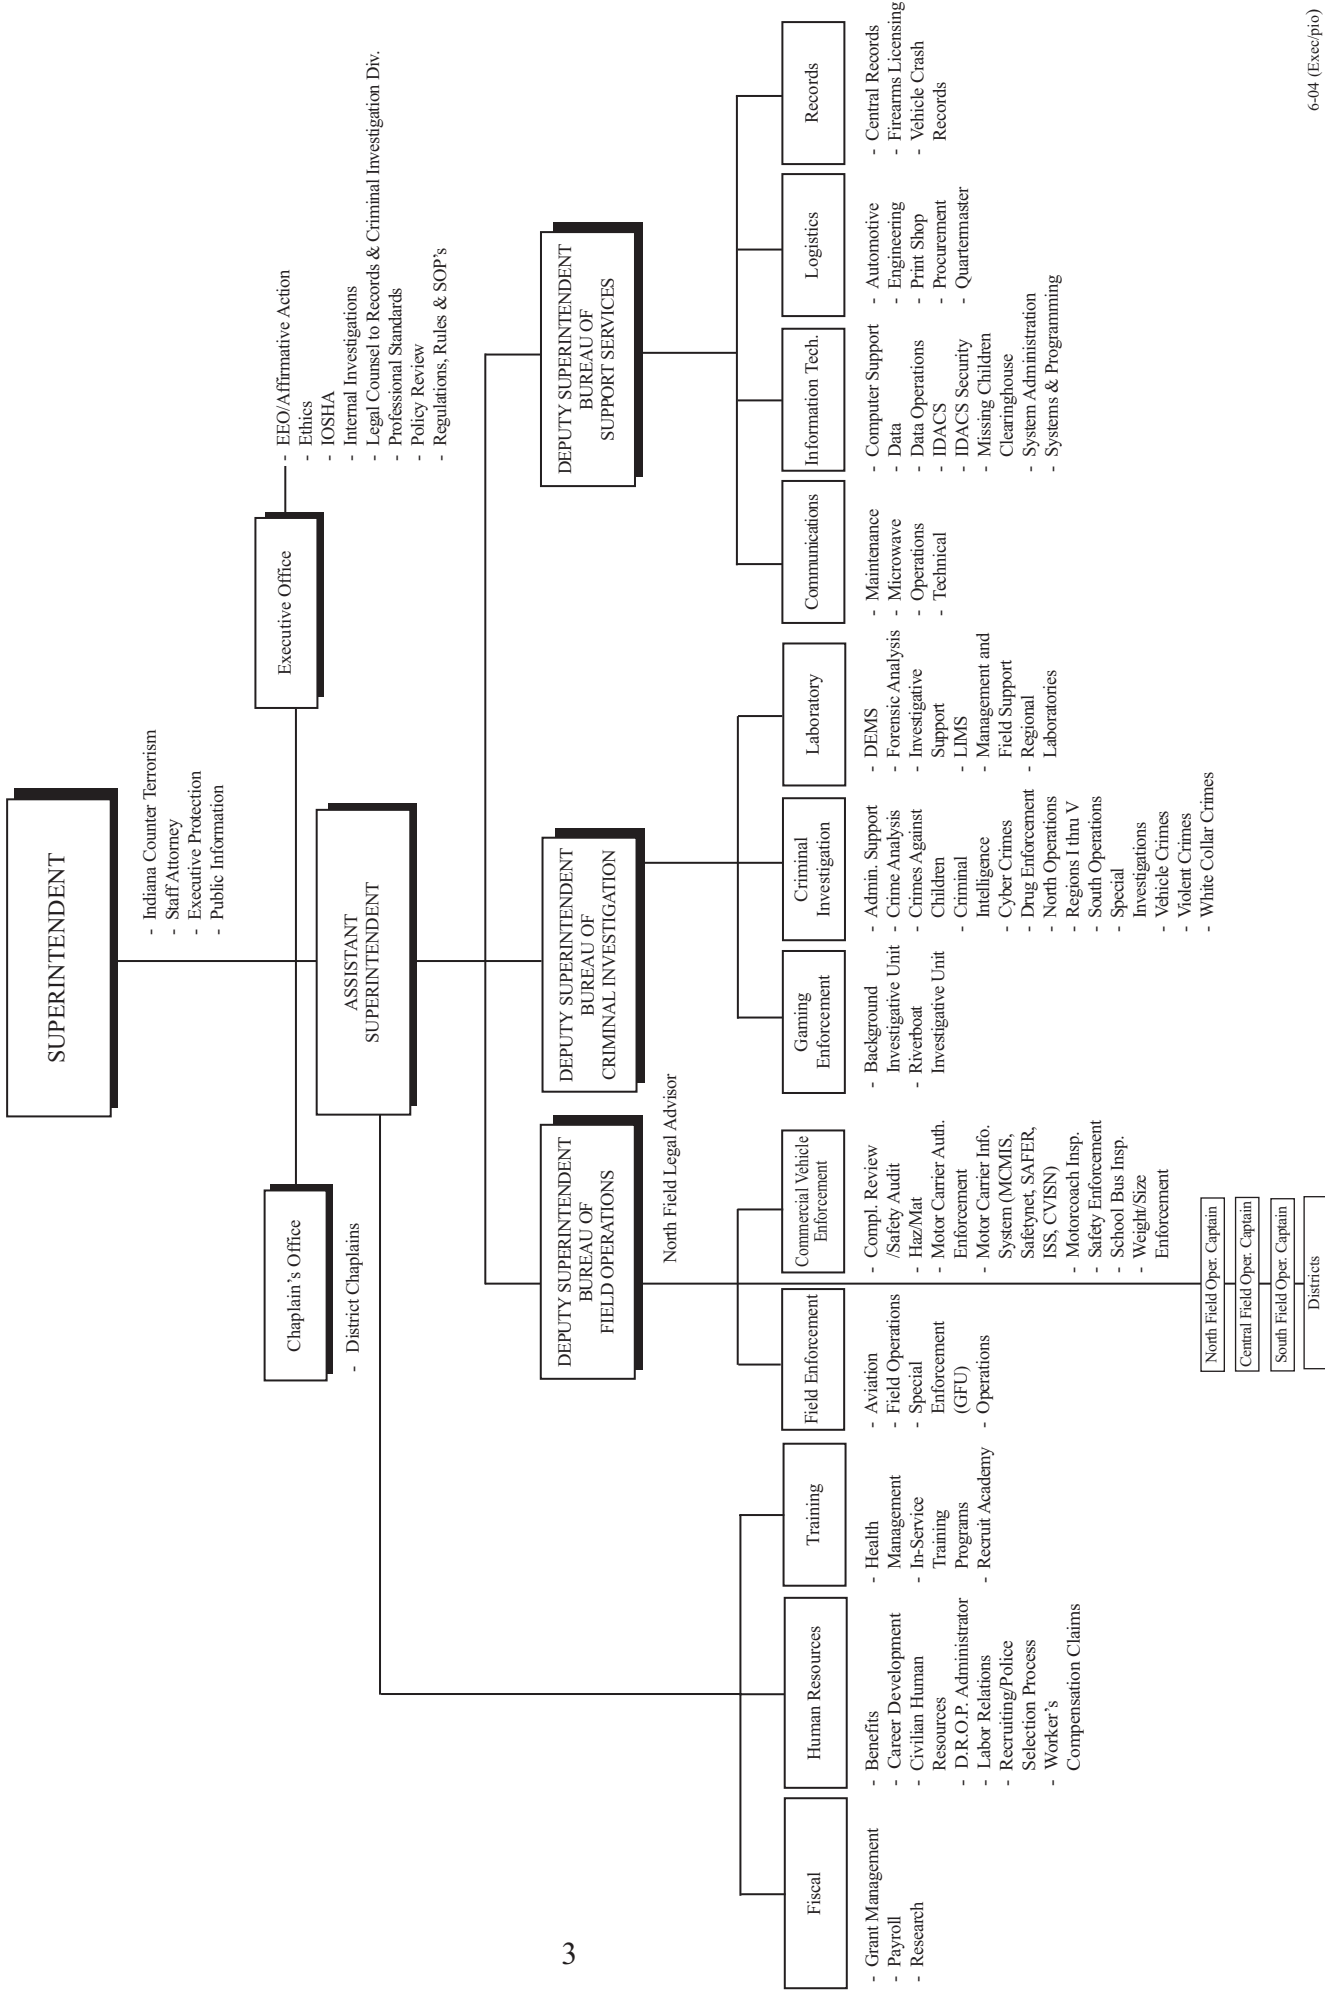

- Hiring, Retention and Support of Quality People
- Career Development
- Outcome vs. Output
- Quality Communications
- Sound Fiscal Management
- Quality Training
- Public Image
- Quality Laboratory Services

The department will utilize the best available technology, including communications technology, to meet the demands of its customers.

Rules of Official Conduct

1. Members of the Indiana State Police shall be habitually courteous. They shall recognize their responsibilities as public servants and shall be particularly attentive to citizens seeking assistance, information, to register complaints or to give evidence.
2. They shall accept their responsibility to the public by being punctual in their engagements and expeditious in the performance of their duties.
3. They shall regard their office as a public trust, and in the discharge of their duties, be constantly mindful of their primary obligation to serve the public efficiently and effectively.
4. They shall administer the law in a just, impartial and reasonable manner and shall not provide more reasonable treatment to some people than to others. They shall recognize the limitations of their authority and at no time use the power of their office for their own personal advantage.
5. They shall be true to their obligation as custodians of public property and shall bear in mind that the misuse or waste of public property is equally as reprehensible as the misuse or waste of money from the public treasury.
6. They shall not limit their effectiveness in the administration of their office by accepting gratuities or favors from those with whom they may have official business.
7. They shall cooperate fully with all public officials, assuring the safety and general welfare of the public. They shall not permit jealousies or personal differences to influence their cooperation with other agencies or with one another.
8. They shall add to their effectiveness by diligent study and sincere attention to self-improvement. They shall welcome the opportunity to disseminate practical and useful information relating to matters of the public's safety and welfare.
9. They shall so conduct their public and private lives that the public will regard them as examples of stability, fidelity and morality.
10. They shall bear faithful allegiance to their government and be loyal to their profession. They shall accept, as a sacred obligation, their responsibility as citizens to support the constitutions and laws of the United States and of the State of Indiana. As public servants, they shall consider the privilege of defending the principles of liberty, as defined in our constitutions and laws, the greatest honor that may be bestowed upon any individual.

Office of the Superintendent

Chaplaincy Program

By the close of 2004, the department had 57 district chaplains serving in the 18 districts throughout the state. Though only 15 chaplains sent in monthly reports, be assured many more of them were very active in serving the people of the department. The chaplains were in the districts, in the hospitals and at funeral homes. The department is still in need of chaplains to serve in the Jasper, Lafayette and Terre Haute Districts.

Executive Protection

The Executive Protection Detail provides security for the Governor, his immediate family and other persons as designated. Units assigned to the detail work at the Statehouse and the Governor's residence. During the election, the detail provided security for the candidates running for Governor and continued to provide security for the outgoing and incoming Governors.

Public Information Office

The mission of the Public Information Office (PIO) is to enhance the department's image through its educational and media efforts. In 2004, the section undertook several projects to fulfill this mission.

Staff began recording public service announcements (PSA) on their laptops for play on local radio stations. The ease of recording allows officers to provide the media with timely PSAs. Additionally, officers continued their involvement with the Road Show, a half hour informational radio show broadcast on stations around the state.

The section's presentation at the Uniformed Safety Education Officer's Workshop won top honors. The program on static electricity fires at fuel pumps was selected by public information officers from around the country as the best program presented at the conference.

Staff continued its involvement with the Media and Emergency Services Organizations (MESO) across the state and began a new chapter in the Lafayette area. The organization provides emergency service organizations, such as the state police, and members of the media the opportunity to build better working relationships.

Coordination of department ceremonies and special events continues to be a responsibility of the office. The office was responsible for conducting promotional ceremonies throughout the year. Staff also hosted the fourth annual Superintendent's Retiree Celebration.

The section continued to be actively involved with Amber Alert. Staff members are part of the call-out teams to assist with issuing alerts and are responsible for routinely testing the broadcast equipment.

The office maintains a database of more than 300 retiree e-mail addresses and adds to the list on a regular basis. Retirement announcements, death notices and other information is electronically forwarded to retirees, releasing the office from the expense of printing and mailing materials.

The Public Information Office strives to release information that is accurate and honest to inform the public and enhance the department's image. This is done through a proactive and coordinated release of information to the media through per-

sonal interviews, news releases and department publications. Personnel also provide photographic, printing and digital imaging services for a variety of programs and divisions.

The Speaker/Community Relations database continues to document educational programs conducted. This report, generated annually, is distributed to district commanders to assist in the assessment of programs conducted in their districts. Personnel presented 2,397 educational programs.

The department has administered youth camps with support from service organizations throughout the state. More than 950 students participated in 16 camps during 2004 and over 30,000 have graduated since the first camp in 1970.

The Indiana State Police Youth Education and Historical Center is the home of Youth Services and houses an extensive collection of police memorabilia, which includes a number of antique police vehicles. Receiving more than 20,000 visitors annually, the center continues to receive positive recognition from police officers and the public.

Staff Attorney

The staff attorney and legal assistant are responsible for processing all litigation, including coordination with the Indiana Attorney General's Office as to legal strategy.

Field inquiries regarding legal issues facing troopers are handled by this office, which also provides legal counsel to the Executive Office on personnel and contractual matters.

In addition, this office handles legislative efforts at both the state and federal levels, including review of internal and external legislative initiatives as well as providing information to legislators on the department's concerns about pending legislation. The office provides training to troopers regarding legislative changes that affect the department's operations.

EXECUTIVE OFFICE

*Major
Michael F. Reedus
Commander*

The Executive Office is responsible for the operation of the Equal Employment Opportunity, Internal Investigation and Professional Standards Sections.

Equal Employment Opportunity Section

The Equal Employment Opportunity Section (EEO) monitors the EEO/Affirmative Action activities of the department and its employees. These responsibilities include in-depth investigations into possible violations of U.S. and Indiana fair employment practice laws by and against department employees.

The section is responsible for submitting the department's Affirmative Action Plan to the appropriate state and federal agencies. The purpose of the plan is to assess the department's progress in the area of EEO/Affirmative Action in addition to providing guidelines into employee conduct.

Training for employees in the area of EEO is conducted upon request of the appropriate commander.

	<u>2002</u>	<u>2003</u>	<u>2004</u>

Internal Investigation Section

The Internal Investigation Section functions as a central repository for internal investigations and preliminary inquiries completed by supervisory personnel. Officers are assigned to conduct lengthy or complicated investigations involving allegations of employee misconduct. The section also provides advice to supervisory personnel on procedural matters regarding internal investiga-

tions. This section provides commanders with information related to the disciplinary process and existing precedent as to penalty in disciplinary cases.

Completed internal investigations and preliminary inquiries are forwarded to the section, checked for accuracy and then presented to the Superintendent for review. Following administrative action, statistical information is extracted and records are securely stored.

Professional Standards Section

Staff audits are designed to provide the department with scheduled objective reviews of all personnel, facilities, equipment, operational activities and Occupational Safety and Health Administration (OSHA) compliance. Staff audits will focus on the administrative and procedural responsibilities of the organizational entity being audited.

Staff audits shall identify and document both positive and negative issues. Recommendations for change in organizational structure, policies, procedures, facilities, programs, personnel, training and equipment shall be provided to the Superintendent.

Staff audits are designed to assist the Superintendent, Executive Staff, division and field commanders in the effective discharge of responsibilities through analysis, recommendations, counsel and information concerning activities reviewed.

The Professional Standards Section conducted three staff audits that included OSHA compliancy at Seymour, Lafayette and Connersville Districts.

Professional Standards is also responsible for routing the department directives for review. Division commanders review all directives biannually. The section also maintains historical files containing department directives.

Office of the Assistant Superintendent Bureau of Financial Management & Human Resources

FISCAL DIVISION

*Major
D. Douglas Biggs
Commander*

The department received approximately \$108.6 million in operating funds from the state legislature and approximately \$30 million in government grants. The division administers and monitors these funds with 12 civilian personnel and four enforcement officers. The primary components of the Fiscal Division are pay-

roll, contracts, travel, research, grant administration and fiscal operations.

The division was successful in cost savings by using new buying methods and renegotiating old contracts. Personnel continue to examine existing agreements and look at replacing old technology with newer, more efficient models. A newly negotiated and updated wireless plan was established for existing department cellular telephones to include a new group-calling concept, which provides substantial savings, as long as current usage levels are maintained. The division also implemented procedures, which achieved the mandated budget reductions for the fiscal year.

The Fiscal Operations Section ensures each employee's payroll check is tabulated correctly. In each biweekly pay period, this section prepares and mails approximately 1,925 payroll direct deposit forms, which total an annual payroll budget of \$97.8 million.

This section is also responsible for the review and submission of all requisitions, contracts, in-state and out-of-state travel requests and interdepartmental billings. In addition, the section processes payments for all departmental purchases from petty cash reimbursements to multi-million dollar vehicle procurements.

The Research Section provides information on topics of concern and safety issues for the Executive Staff. The section also responds to numerous requests for information from other law enforcement and community agencies.

The Grant Administration Unit assists other divisions with the administration of 39 grants and interagency agreements. These state and federally funded programs provide valuable resources.

HUMAN RESOURCES DIVISION

*Major
Phillip A. Parker
Commander*

On a regular basis, the Human Resources Division handles recruitment for both sworn and civilian positions, administration of police and civilian promotion processes, disability programs, health insurance issues for active and retired members, pension loans, retirements and resignations. The staff also handles line-of-duty injuries, the Deferred

Retirement Option Program (DROP), overtime, regular attendance processing and verification. They also ensure compliance with federal and state laws and maintain all personnel, insurance and pension files.

The division continued to work with a disability management company in the review of those on disability. As a result of the independent medical examinations, five individuals returned to duty.

The division completed a Request for Proposal process for the Indiana State Police Health Care Plan. After committee review, a contract was renewed with Anthem for the period July 1, 2004, through June 30, 2008. New benefit booklets were distributed to members. An online open enrollment for health insurance and flexible spending accounts was held eliminating the cost of sending personnel to each facility.

The 64th Recruit Academy graduated 42 cadets in October. One hundred police vacancies were announced, with 76 promotions and 24 reassignments. One hundred eighteen civilian vacancies were announced, with 67 new hires, and 21 promotions. A selection process for Government Facilities Unit officers was completed in June with seven officers hired. The division assisted the Laboratory Division in the hiring process for 22 forensic scientist positions.

TRAINING DIVISION

*Major
Danny L. East
Commander*

The Training Division continued moving toward technology-based training. The division's efforts to reduce training costs by working with commanders to identify mission critical and essential training were successful. Grant funded training continued to provide a means to reduce department costs.

The division devoted a significant amount of resources and time to conducting the 22 week Recruit Academy. New to this academy was the introduction of "The Quickening," which incorporates classroom training with real world experiences to help prepare recruits for the road. Working with the Information Technology Division, laptop computers were issued to recruits at the start of the academy. As part of the 64th Recruit Academy, the department utilized a wireless communication system for academy staff and recruits, making the department the first state police in the nation to make use of this technology.

The division received a grant in 2004 from the U.S. Department of Health and Human Services to purchase an additional 55 Automated External Defibrillators (AED). These AED's were issued to road troopers in rural counties and brings the department's total to 176.

The Training Division developed a curriculum titled "Stop Abuse and Sexual Assault Against Older Individuals" that was approved by the federal Office of Violence Against Women. The department gathered the support of community based, non-profit organizations to assist with cur-

riculum development and implementation of this program.

Regional crash reconstruction training conducted in March and June, resulted in the certification of 96 enforcement personnel. The training focused on the new "DRAW" program used with the Officers Standard Crash Report and the use of LIDAR measurements for advanced crash diagramming.

The division also:

- Completed breath test operator certification and re-certification for 548 personnel.
- Completed an Instructor Development School for 21 employees.
- Coordinated a Basic Explosive Ordnance Recognition (EOR) School and the annual EOR/EOD annual re-certification.
- Coordinated training for units assigned to the department's new Motorcycle Program.

Incident Command System (ICS) training transitioned from tabletop exercises to functional exercises, which were conducted at three sites with State Emergency Management Agency (SEMA).

The implementation of newly designed officer survival tactics firearms training continued during each of the five firearms shooting phases. Each shooting phase challenged the officer's awareness and assessed their reactions to threats. In addition, the importance of shot accountability was stressed. Individual officer survival tactics were repetitively instructed, monitored and evaluated. As part of the department's firearms program, division staff coordinated and completed weapons armoring for all enforcement personnel.

"Active Shooter" training was coordinated and conducted at 42 sites around the state providing opportunities for all district enforcement personnel to participate. In addition, the division worked with an increasing number of local law enforcement agencies to provide them with Active Shooter instructors and role players.

With the assistance of the Information Technology Division, a "Wellness Link" on the department's Intranet was implemented. This link was established to disseminate information from the Wellness Council of America, WebMD, Anthem Health and the American Council on Exercise to department personnel.

Bureau of Criminal Investigation

CRIMINAL INVESTIGATION DIVISION

*Major
Larry C. Turner
Commander*

The division is staffed with both police and civilian personnel who investigate intricate crimes, carry out specialized investigations and provide support to enforcement personnel. Investigators are assigned to each of the 18 districts, as well as the Criminal Intelligence, Drug Enforcement and Special Investigations Sections. The division also participates in numerous local, state and federal task forces and also assists many other entities of the criminal justice system.

Criminal Intelligence Section

The Criminal Intelligence Section (CIS) assisted with many cases, which included providing leads in a cold case investigation, assisting in locating fugitives and helping to locate a possible child abductor before he had a chance to kidnap the child in question. Personnel also assisted in building the case against a multi-state vehicle theft/fraud suspect, uncovering a multi-state identification fraud ring and identifying information on narcotics targets in a grand jury investigation. They also compiled research and data pertaining to the National Socialist Movement into a PowerPoint presentation, which was instrumental in assisting many states with protest rallies. CIS also expanded ties with the FBI Joint Terrorist Task Force, assisting them with many cases.

The Crime Analysis Unit is staffed with criminal analysts, who assist officers and provide a variety of services. Nearly all CIS analysts were certified as users on the new INSPECT system. The program is accessed via the Internet and provides quick information on individuals prescribed Schedule II, III, IV and V prescriptions.

CIS stores all submissions and conducts all queries for the Violent Crime Apprehension Program (ViCAP), a database for monitoring and analyzing violent crimes. The Department of Correction continued to enter all of their murder, molestation and sexual assault cases into the Indiana ViCAP Data Center. CIS took the initiative to enter all department murder and child exploitation cases fitting the ViCAP requirements into the system.

The Administrative Support Unit is staffed with a case management system clerical assistant and two intelligence report data input operators who maintain databases that track criminal investigations and perform intelligence data entry and retrieval. A total of 21,463 new criminal case and incident reports and 4,333 intelligence reports were processed.

Drug Enforcement Section

The Drug Enforcement Section (DES) conducts covert investigations into drug trafficking. It is comprised of the Technical Services, Diversion, Undercover, Airport and Highway Interdiction Units. DES detectives are also assigned to federal task forces with the Drug Enforcement Administration (DEA) in Indianapolis and Evansville and the Internal Revenue Service (IRS) in South Bend. Additionally, several DES detectives are assigned to work with various multi-agency local drug task forces.

The Technical Services Unit provides support to department detectives, as well as other state, local and federal investigators. They were also involved in the installation and use of recording equipment and GPS tracking systems. Technicians provided surveillance support with four surveillance vehicles, which are maintained by the unit.

Diversion Unit detectives focus on those in the healthcare industry who are involved in the illegal diversion of otherwise legal prescription drugs. They

were involved in a variety of investigations ranging from obtaining prescriptions by fraud, theft of drugs by healthcare professionals and the diversion of drugs by various pharmacy technicians.

The Airport Interdiction Unit is a multi-agency task force comprised of state police, Indianapolis Police Department, U.S. Customs and DEA personnel. The task force was responsible for the seizure of over 600 pounds of marijuana, cocaine and methamphetamine. The task force also seized over 1,000 dosage units of steroids and just under a quarter of a million dollars in U.S. currency.

Undercover detectives primarily focus their efforts on investigating persons who are engaged in the distribution of illegal drugs. However, methamphetamine has become the drug posing the largest threat and challenge to law enforcement. Methamphetamine is not only a drug problem for DES detectives, but is related to a host of other crimes that affect all law enforcement officers. Most DES cases typically have a drug connection, but detectives also investigated cases involving burglary, armed robbery, conspiracy to commit murder and vehicle theft.

The section worked with the DEA to identify a methamphetamine trafficking organization in the Indianapolis area. The case developed into a Title III investigation and resulted in the indictment of 10 defendants and the seizure of vehicles and U. S. currency. They conducted several significant drug raids around the state. In particular, a raid with the IMAGE Drug Task Force resulted in the arrest of 13 defendants on 22 drug related charges. A mutual investigation with the ATF conducted in rural Crawford County resulted in the arrest of three defendants on federal drug and weapons violations as well as locating a methamphetamine lab.

In July, troopers assigned to highway interdiction were placed under the command of DES to form the Drug Enforcement Section Uniform Squad. The squad worked throughout the state in an attempt to interrupt the flow of narcotics coming into the state. These troopers were responsible for the seizure of over 2,500 pounds of marijuana, more than 70 pounds of cocaine, nine pounds of methamphetamine and in excess of \$300,000 in U. S. currency.

Special Investigation Section

The Special Investigation Section is comprised of four units: Crimes Against Children (CACU), Cyber Crimes, Vehicle Crimes and White Collar Crime. The section functions as a central repository for background investigations for prospective government appointed positions and applicants for other law enforcement agencies. The section received a total of 1,101 requests for Level I background investigations, 15 Level III background investigations and 78 out-of-state and local police department background investigation requests. The section also processed 284 complaints of Internet theft and fraud referrals from the Internet Fraud Complaint Center, a joint project of the FBI and the National White Collar Crime Center.

The CACU, Internet Crimes Against Children Task Force (ICAC), and U.S. Customs Agents served a state search warrant at a suspect's residence in Carlisle, where several items pertaining to a child exploitation case were removed. The accused was charged with molesting his 15-year-old daughter and his 6-year-old mentally handicapped daughter and utilizing a web cam for his online contacts to watch. Child protection workers removed the children from the home.

The CACU, ICAC and the FBI served a federal search warrant at a suspect's Danville residence where two computer systems were removed. Information obtained through interviews of subjects living at the residence led to the arrest of a convicted sex offender, the arrest of a second man and a third subject wanted on felony charges.

CACU detectives investigate complaints against predators who seek to harm children through trafficking in child pornography or soliciting minors for sexual encounters. Detectives work closely with U.S. Postal Inspectors, U.S. Customs, Internet service providers, photo developers and the National Center for Missing and Exploited Children.

The Cyber Crime Unit (CCU) conducts forensic examinations of computer systems. Detectives have software to recover deleted and covert files from computer systems and have recovered computer evidence in criminal cases from murder to possession of child pornography. The department continues its partnership with the Grant County Sheriff's Department in a task force called the

North Central Indiana Cyber Crime Unit and using resources from both agencies, the unit is processing computers seized from crime scenes.

Vehicle Crimes Unit (VCU) detectives concentrate on proactive investigations relating to all issues of vehicle theft. Detectives initiated 87 new cases and recovered 81 stolen vehicles. They recovered six pieces of construction equipment and inspected 14 pieces of construction equipment. VCU detectives conducted 28 salvage yard inspections, some of which were with other agencies. They also conducted 29 dealer inspections and inspected 2,765 vehicles. One investigation was concluded with the conviction of a car dealer for corrupt business influence and theft. The suspect failed to pay the auction for the vehicles he purchased and did not deliver over 70 titles to his customers for vehicles purchased. He was also ordered to pay restitution in the amount of \$350,000.

An investigation involving cloned vehicles from Florida entering Indiana and Kentucky was started by the VCU with assistance being requested from the FBI. During this investigation, VCU started working with a task force in Miami, who were missing approximately 200 late model vehicles. To date, approximately \$1.2 million in property and vehicles have been recovered.

White Collar Crime Unit (WCCU) detectives work financial crimes and allegations of political corruption. Detectives have seen a dramatic increase in electronic crimes reported to the unit ranging from identity theft to frauds committed through Internet auctions.

Detectives investigated a case involving the theft of over \$300,000 in funds from the North White School Corporation resulting in the conviction of two persons. They also investigated a case adopted by the U.S. Secret Service and the IRS where a bank employee was getting kickbacks from bogus deposits made by relatives totaling \$290,000.

NORTH CRIMINAL OPERATIONS

*Captain
Robert J. Rich
Commander*

North Criminal Operations consists of two regional offices, one at Lowell and another in Fort Wayne. The zone encompasses 39 counties, which are divided into seven districts. Within the regions are several highly populated areas: Allen, Delaware, Elkhart, Lake, Porter, and St. Joseph Counties, which present unique investigative challenges. To address these challenges, partnerships and task forces have been formed with local and federal agencies to combat both violent and white collar crimes.

One such partnership is the Gary Response Investigative Team (GRIT), whose function is to disrupt gang activity, locate fugitives and investigate illegal drug activity in Northwest Indiana. The task force made 63 arrests, obtained 30 federal indictments, dismantled two gangs and had eight wiretaps. They seized 6,900 grams of cocaine, 507 grams of marijuana, 45 handguns, 32 shoulder weapons and \$43,000 in U.S. currency. One GRIT operation helped to disrupt the Renegade Street Gang, which was responsible for a significant portion of powder and crack cocaine sales in and around Gary. The gang was also involved in numerous criminal activities including murder. Over the course of the investigation, GRIT arrested 18 suspects, recovered 13 firearms, seized five vehicles and recovered two kilos of cocaine.

Another important task force is the Northwest Indiana Public Corruption Task Force (NWIPCTF), which consists of state police, FBI, IRS and local officers. The task force has exhausted numerous man-hours investigating corruption within the East Chicago city government. Numerous indictments for misappropriation of federal funds have taken place and a judge ruled East Chicago's city elections were so fraudulent that new elections were required.

North Criminal Operations were also successful with cold case investigations. Investigators solved a 1987 homicide using various interview techniques and laboratory testing unavailable at the

time of the crime. Another investigation led to the conviction of an individual for two violent attacks at a rest park on Interstate 94 in 1999. One victim died and the other was severely beaten. Again, good interviewing and DNA testing were crucial in the ability to charge the suspect.

Region I

Region I is comprised of the Lafayette, Lowell and Peru Districts and encompasses 21 counties in northwest Indiana.

Lowell detectives investigated the murder of a female who had been shot once in the head. Three witnesses were interviewed along with the victim's husband. Two of the witnesses reported they had wrestled the weapon away from the victim's husband shortly after the shooting. During the course of the husband's interview, he stated the shooting was an accident. The husband told investigators he had thrown the handgun on the bed and the weapon discharged. The victim's daughter located a journal kept by the victim stating the suspect had previously threatened to kill her. A friend reported the victim had told her a month earlier her husband was going to kill her. The husband was later arrested and is awaiting trial.

The Lake County Prosecutor formally requested an investigation into alleged criminal misconduct by a judge, who allegedly extorted money from counseling services, taxpayers, public employees, the State of Indiana and 1,175 offenders who appeared in her court. The indictment claimed the judge illegally altered traffic citations to appear as if the violations had occurred on town roads, causing fines to remain in her court instead of going to the state. The 10-month investigation was a joint effort involving the Indiana Attorney General, State Board of Accounts, Lake County Prosecutor, U.S. Attorney's Office and the FBI. The indictments are pending final court dispositions.

Lafayette investigators worked with cold case detectives from Orlando, Florida on a 16 year old homicide case involving a 12 year old girl. A person of interest in the case had moved into the Lafayette District in the years following the murder and detectives assisted in locating the subject, obtaining a search warrant, questioning him and arranging his transportation back to Florida. Under questioning, the subject revealed he knew

who had killed the victim and was willing to assist the detectives. Based on the information provided by this witness, two suspects have been arrested in this murder and are awaiting trial.

Lafayette detectives also investigated a road rage shooting on Interstate 65 in Tippecanoe County where, according to witnesses and the victim, traffic was stopped due to a car crash. A female suspect left her car and pointed a handgun at the victim. The suspect ordered the victim out of her car. The victim tried to flee on foot and the suspect shot her twice and then began to shoot the victim's vehicle. The suspect then fled but was apprehended less than two miles from the scene. The victim was transported to the hospital and treated for gunshot wounds. The suspect, who has a history of mental illness, is being held at Wabash Valley Mental Hospital.

Peru detectives investigated an attempted murder in which the Converse deputy town marshal was shot while attempting to question a suspect about harassing telephone calls. Area law enforcement officers responded to the scene after the suspect refused to surrender. The suspect exited his residence with a rifle and fired at officers. The officers returned fire killing the suspect.

Another attempted murder occurred in Fulton County, where a female suspect shot her ex-husband when he exited his residence. After the victim fell to the ground she shot the victim again. The suspect admitted shooting the victim after he had left threatening messages on her answering machine. She was arrested and is awaiting trial.

Region II

Region II is comprised of Bremen, Fort Wayne, Redkey, and Toll Road Districts and encompasses 18 counties in north central and northeast Indiana. Detectives initiated 305 new investigations and made 127 criminal arrests. The area Clan Lab Teams disposed of 119 clandestine labs in the region.

Fort Wayne detectives investigated several public officials resulting in numerous criminal arrests. A complaint of domestic battery was investigated against an Ossian police officer resulting in charges against the officer. Detectives also investigated a criminal recklessness complaint against a deputy marshal resulting in his arrest.

Troopers responded to a report of a man shooting at passing cars on U.S. 20 in Steuben County and upon their arrival the suspect shot at a trooper striking his vehicle. Officers ordered the suspect to drop his weapon, when the suspect refused and walked toward them, officers fired at him. The suspect fled into a wooded area where he was later apprehended by Emergency Response Team members and charged with attempted murder.

Fort Wayne detectives and members of the Federal Bank Robbery Task Force worked several bank robberies. During a robbery at the First National Bank of Fremont in Waterloo, the suspect inferred he had a bomb. The investigation determined the same person was responsible for four other robberies in Indiana, Michigan and Ohio. Cooperation between local agencies and the FBI led to the arrest of the suspect in Michigan. Detectives also worked a bank robbery at the National City Bank in Fort Wayne where three armed suspects entered the bank demanding money. All three suspects were apprehended and a gun and cash were recovered. Detectives also investigated a bank robbery at Bank One in Columbia City. The suspect entered the bank and handed the teller a note demanding money. The investigation determined this same person had been responsible for numerous bank robberies in several states.

Fort Wayne detectives, working with ATF, investigated the arson of a building in LaGrange. The building housed several businesses and occupied apartments. Investigators traveled to El Paso, Texas to interview a suspect who eventually confessed. The investigators determined one of the business owners had hired the suspect to set the fire resulting in additional arrests.

Detectives also followed up on several burglary cases in which the suspects had been identified. These suspects were responsible for safe burglaries at CVS Pharmacies and other retail stores in Indiana, Illinois, Kentucky, Michigan, New York, Ohio, Pennsylvania and Tennessee. Working with dozens of local departments as well as the U.S. Marshal's Office, enough information was gathered to obtain a search warrant which led to the arrest of one suspect who in turn gave the location of the second suspect. Both suspects have been charged.

Bremen detectives investigated an individual, who was performing physical examinations on young male adolescents in his counseling office. Numerous interviews were conducted with current and past patients of the clinic. The suspect, who held a degree in psychology, was charged with practicing medicine without a license and three counts of battery.

Troopers, detectives and laboratory personnel uncovered four of the largest methamphetamine labs in Indiana history and removed thousands of pounds of chemicals from all four locations. The labs were uncovered over a one-week period being operated by a single suspect, who had been manufacturing and selling chemicals over the Internet for years. The suspect manufactured many of the chemicals from scratch. These chemicals when mixed could be used as explosives for the manufacturing of methamphetamine and pyrotechnics. The FBI, ATF and DEA also sent personnel to assist in the investigation. Federal authorities are still investigating the suspect for any terrorist links.

Detectives worked a homicide in Argos, where a male victim was stabbed in the back with his own knife. The suspects fled the crime scene and were involved in a serious car crash whereby troopers arrested them. Detectives worked a second homicide in Argos, where the suspect lay in wait for the victim to return home. The victim was shot in the eye with a shotgun as he entered his home. As a result of this case detectives were able to solve an old burglary case in South Bend, where a shotgun was stolen. Detectives re-interviewed the suspects and obtained a confession on the burglary. From that point, they were able to track the shotgun from the burglary to the suspect and the suspect's brother. The suspect and his brother have pled guilty.

Detectives and troopers identified a suspect vehicle and subsequently the person responsible for multiple drive-off thefts of diesel fuel in Lake County. This investigation resulted in the arrest and confession of a suspect from Chicago. The conclusion of this investigation led to several public announcements and posted flyers along the Interstate 80-90 corridor for deterrence purposes. The campaign was successful as fuel thefts ceased.

Toll Road troopers arrested a suspect on a warrant for possession of marijuana and discovered \$11,000 in a locked safe in the trunk of the vehicle. Detectives were able to link this money to a bank robbery that had occurred in Elkhart just a week prior.

Detectives investigated missing funds from the Portage Barrier after a large bundle containing 83 INDOT toll tickets were found by a patron and returned to the Toll Road. A Toll Road employee confessed to two separate instances of theft. Further investigation revealed over one thousand toll tickets were not validated over a six-week period and an estimated \$4,000 may have been taken by this employee.

Redkey detectives worked the first homicide to have occurred in 29 years in the small community of Montpelier. The victim, an illegal alien from Guatemala, was stabbed multiple times and found by his wife. The couple's three-year-old son was in the residence where the crime occurred and was believed to have been asleep when the altercation took place. The suspect, who was having an affair with the victim's wife, was also an illegal from Guatemala and had been living with the victim's wife during her husband's absence due to incarceration and deportation. The suspect is currently awaiting trial for murder.

The Blackford County prosecutor requested Redkey detectives assist Child Protection Services with a complaint against a Hartford City firefighter. This bizarre investigation involved sex acts between the suspect and his 12 and 16 year-old stepdaughters. The juvenile females would frequently perform sex with their stepfather while the mother would watch and video these acts. The mother would reward the girls with cigarettes or other gifts for their cooperation. The stepfather was convicted of sexual misconduct with a minor and received a 20-year sentence. The mother's trial is pending.

A two-year fraud investigation by Redkey detectives came to a close in April with the arrest of three family members from Pennville. The fraud involved over \$88,000 and the defendants, parents and their disabled son, were charged with 21 felonies. The disabled son, age 35, received Medicaid and other public assistance over a three

year period to cover medical expenses. The investigation revealed a private insurance company also paid these expenses.

Several successful drug investigations were conducted at the Redkey District. Two troopers were assigned to the Northeast Marijuana Eradication Team. These officers initiated 22 cases resulting in the arrest of 25 defendants on 70 criminal counts and recovered 840 cultivated plants.

A prominent Winchester dentist and his teenage son were arrested at their Farmland home where a search warrant revealed an elaborate indoor/outdoor grow operation. The dentist and his son had a sophisticated operation, which included heating, cooling and irrigation systems. Over 100 indoor plants were confiscated along with more than 100 plants being cultivated outside on their property.

SOUTH CRIMINAL OPERATIONS

*Captain
C. Dale Mulliken
Commander*

South Criminal Operations serves 53 counties and is divided into three investigative regions, which are further divided into 11 districts. The region includes metropolitan areas such as Evansville, Indianapolis, Richmond and Terre Haute as well as rural areas throughout southern Indiana. Detectives in South Criminal Operations investigated 117 deaths and were assigned 35 cases in which elected, appointed or other public officials were subjects of criminal investigations. Clandestine methamphetamine labs were again a problem in central and southern Indiana, with 70 percent of the methamphetamine labs seized in Indiana found in South Criminal Operations.

Region III

Region III is comprised of Bloomington, Evansville, Jasper and Terre Haute Districts and encompasses 23 counties. During the year, Region III detectives worked 46 death investigations.

Bloomington detectives conducted eight death investigations, two of which were homicides.

Detectives also continued to work on a case in which skeletal remains were found in Owen County in November of 2003. They consulted with experts to reconstruct the face in an attempt to identify the victim.

Bloomington detectives have also been involved in several high profile cases this year. One of these investigations involved the Taser death of a prisoner in the Monroe County Jail, which received international media exposure.

Detectives also worked a case where a partially decomposed body wrapped in a blanket was found in Brown County in October. Investigators worked with forensic experts to recreate a drawing of a tattoo on the victim's ankle that enabled them to narrow down the enormous number of missing persons. Dental records were then used to positively identify the victim as a female missing from Indianapolis. Further investigation continues into this homicide which is believed to have occurred on the southeast side of Indianapolis.

Jasper detectives spent much of their efforts investigating nine deaths, 21 cases of child molestation, 43 thefts and 48 forgeries. One death investigation was an unusual murder-suicide in Orange County where the suspect murdered his girlfriend's father upon learning that her father had molested her when she was a child. The suspect confronted the victim at his residence and cut the victim's throat, nearly decapitating him, then transported the victim's body, in the bed of his pick-up truck, to a local tavern where he told some of the patrons what he had done. The suspect then dropped the victim's body at the doorstep of the Orleans Police Department. The suspect was later located and ERT members surrounded the residence while negotiators attempted to convince the suspect to surrender. Despite their efforts, he ultimately took his own life.

Jasper detectives also investigated a case, in which the victim was abducted at gunpoint, severely beaten and terrorized. After the suspect shot the victim's television, he would spin the cylinder of the revolver, point it at her and pull the trigger. The victim was then taken out-of-state where she was raped. The suspect was arrested in Tennessee and charged with multiple crimes in both states.

Evansville detectives conducted 16 death investigations, three of which were homicides, worked 28 cases of child molestation, seven other child sexual abuse cases, eight cases of rape, along with several cases of burglary and theft.

Evansville detectives assisted the Vincennes Police Department with the investigation of a two-year-old child's death, when it was determined that the child died from non-accidental injuries. The mother's live-in boyfriend was arrested for involuntary manslaughter.

Detectives in Evansville assisted the Posey County Sheriff with a homicide investigation where an elderly victim was brutally murdered with an axe. The suspect was arrested and pled guilty to the murder. They also assisted Posey County Sheriff's detectives with a homicide investigation where the victim was shot several times by her live-in boyfriend. The boyfriend fled the area but was located and arrested a few days later. The suspect is currently awaiting trial.

Detectives at Evansville assisted Vincennes Police detectives with a homicide investigation where the victim was found brutally murdered in his home. The victim's brother entered the victim's home and beat him in the head with a hammer. The suspect then fled the area and traveled through several states. With the assistance of the U.S. Marshal's Service, a wiretap was placed on the suspect's phone and he was located at a motel in Gallup, New Mexico. Detectives traveled to New Mexico to arrest the suspect, who is awaiting trial.

Terre Haute detectives conducted 13 death investigations and solved two old homicides. In July, detectives arrested an inmate at the Wabash Valley Correctional Facility for the 1985 murder of a Clay County man. DNA analysis, not available at the time of the murder, matched the suspect to cigarette butts recovered from the crime scene. This information coupled with other evidence led to the arrest. The suspect pled guilty to the charge.

Forensic evidence also led to an arrest in the 2003 murder of a Brazil man who was stabbed multiple times. The investigation began when detectives were called to assist the Brazil Police Department. DNA and fingerprint evidence was collected and submitted for analysis. The laboratory results were sufficient for the issuance of an arrest warrant.

Terre Haute detectives and Department of Corrections (DOC) investigators at the Wabash Valley Correctional Facility stopped a long running heroin trafficking ring with the arrest of two inmates and a Hammond man. In another case, detectives arrested three corrections officers on charges of battery of inmates. Detectives investigated the theft of \$67,000 from the Clinton Water Department and as a result, two former employees were arrested and charged with two counts of theft.

Region IV

Region IV is comprised of Connersville, Sellersburg, Seymour, and Versailles Districts, which encompasses 20 counties in southeastern Indiana. Due to the rural nature of this region, detectives are called upon by other agencies for assistance on a regular basis. Working in collaboration with local, state and federal agencies, detectives resolved six arsons, 214 batteries, 130 burglaries, eight murders, 18 rapes, 11 robberies and 399 theft cases. Methamphetamine producing clandestine laboratories were again a problem, consuming large numbers of man-hours and negatively affecting the lives of the citizens in this area of the state. A total of 261 methamphetamine labs were seized, an increase of 27 percent. Region IV detectives initiated a total of 18 new special investigations, closed 16 special investigations and are currently investigating seven public official cases.

Connersville detectives successfully investigated multi-state white collar crime cases with ties to Hawaii. The cases were initiated after an elderly couple reported having unauthorized bank withdrawals made from their accounts to an address in Nevada. The withdrawals were then routed through a business in Arizona. By networking with investigators in several states, detectives identified a suspect who had established bogus financial institutions in quite a few states. Using information developed by detectives, the suspect was arrested. Business computers and financial records were seized which revealed a large number of unwitting elderly victims throughout the United States. The amount of loss in this investigation will likely approach several million dollars.

Sellersburg detectives investigated a double murder case in Harrison County that resulted in

the arrests of two suspects. Leads revealed one of the suspects was a son of one of the victims. Detectives were able to obtain arrest warrants and further investigation revealed the suspects had fled to Florida. Working with law enforcement officials in the Daytona Beach area, detectives were able to bring the suspects back to Indiana to face the charges.

Sellersburg detectives also initiated a death investigation in Washington County in which the body of a 13-year-old male was found in a creek bed under a bridge. Detectives have interviewed numerous persons and crime scene technicians have processed several locations for evidence related to the case. This investigation revealed the 13-year-old victim had been reported missing in Scott County the day before his body was discovered. Investigators are still working this case as additional leads develop.

Detectives investigated another murder case in which a Scott County man and an acquaintance were killed by gunshots to the head. Using evidence found at the scene, autopsy results and witness statements, detectives determined a murder had taken place and then the suspect shot himself.

Seymour detectives worked with the FBI and law enforcement officials from Kentucky and Illinois on a murder investigation in which a Chicago resident was found dead in a drainage ditch north of Seymour. Investigators determined the suspect, a man from Kentucky, had been involved in a domestic dispute with the victim while in Illinois. He had killed the victim and disposed of the body near Seymour while traveling back to Kentucky. As a result of this collaborative investigative effort, criminal charges were filed against this suspect.

Seymour detectives also assisted in the investigation and arrest of a Columbus attorney on charges of perjury and drug-related offenses. The suspect was a former Columbus city attorney and a public defender in Marion County at the time of arrest.

Detectives, working with the FBI and the Indiana Department of Revenue, closed a two-year investigation in Bartholomew County with the conviction of a Columbus man on computer tampering charges. Detectives determined the busi-

nessman was altering and selling satellite television access cards while operating a transportation company located in Columbus. The suspect was ultimately convicted.

Versailles detectives investigated a home invasion and armed robbery case in Dearborn County where the sleeping victim was surprised and bound at gunpoint by multiple suspects. Once the victim was tied, the suspects ransacked the home taking valuables. Working with detectives in Cincinnati, the suspects were identified after cashing stolen checks and the stolen property was subsequently recovered. The suspects were jailed in Ohio and additional charges have been filed in Indiana.

Versailles detectives successfully conducted several special investigations involving allegations against public officials. Detectives pursued these allegations and several public officials were arrested and charged as a result, including two township trustees, a county commissioner and a police officer.

Region V

Region V is comprised of the Indianapolis, Pendleton, and Putnamville Districts and covers 10 central Indiana counties. Given the combined urban and rural make-up of the region, detectives investigate a wide range of criminal violations and allegations.

Pendleton detectives initiated a voter fraud investigation in Anderson at the request of the Madison County Prosecutor where voters who lived out of the city were being recruited to vote using an address in the city. Additionally, nursing home patients were coerced into casting Democratic absentee ballots when they requested Republican ballots. This investigation resulted in seven persons being charged with 42 felony counts of voter fraud.

Pendleton detectives conducted an investigation requested by the Elwood City Court judge that resulted in theft charges being filed against the assistant court clerk.

Detectives also assisted officials from Sumter County, Florida, with a cold case homicide investigation where the victim had been killed along Interstate 75 in 1987. The prime suspect in the case was incarcerated at the Pendleton

Correctional Facility and interviews with the suspect's ex-girlfriends and DNA testing resulted in murder charges being filed against the suspect in Florida. Pendleton detectives also initiated 97 cases at the three Department of Correction facilities located in the district.

A two-year investigation of the Family and Social Services Administration (FSSA) culminated with the Marion County Grand Jury issuing indictments for five suspects and one arrest of another suspect. Those arrested included former employees of FSSA who engaged in contract fraud and misappropriation of state funds. A total of 85 criminal charges were filed, 81 of which were felonies.

In February, a retired police officer reported a burglary at his residence where 13 firearms and other property were taken. Detectives recovered all of the stolen property. One suspect was charged and another arrest pending based on the outcome of DNA analysis.

In July, Indianapolis detectives worked an investigation where a suspect was impersonating a radio talk show host. The suspect was calling local residents and gaining their participation in an alleged radio station promotion where he would have participants come to his home and engage in bizarre conduct such as clothes swapping, body hair shaving and super gluing their hands together. The alleged grand prize for the promotion was \$50,000 or a vehicle. It was discovered the suspect was not affiliated with the radio station and the promotion was merely a scam to satisfy the suspect's personal gratification. The suspect was arrested and charged with multiple counts of criminal confinement and identity deception.

Putnamville detectives were requested to investigate the practices and procedures of the Indianapolis Marion County Crime Lab. Allegedly, scientists were not following proper procedures, had questionable certifications and had been accused of sabotaging scientific results. Detectives conducted two audits and amassed over 2,000 hours of investigation. As a result, the director and assistant director of the lab were terminated and the technical leader of the lab resigned.

An Indiana Department of Correction employee, who was concerned that an attempt had been

made on his life, contacted Putnamville detectives. The employee reported finding a foreign substance in a beverage at his home. The substance was examined and determined to be arsenic. The wife of the employee confessed to tampering with the beverage and she was charged with one count of attempted murder and one count of consumer product tampering.

Putnamville detectives were summoned to a home in Morgantown and found a mother and her son shot to death at close range. After an extensive investigation, the deceased woman's husband was arrested for murder and sentenced to 112 years in prison.

GAMING ENFORCEMENT DIVISION

*Major
Carlos A. Pettiford
Commander*

The Gaming Enforcement Division provides investigations and enforcement support to the Indiana Gaming Commission. The division consists of 120 enforcement positions and various support staff in and outside of the division.

The division is divided into two sections, the Background Investigative Unit (BIU) and the Riverboat Investigative Unit (RIU). The primary objective of the division is to protect the assets of the citizens of Indiana by monitoring the integrity of the gaming industry operating within the state.

Background Investigative Unit

Eight investigators under the direction of two sergeants have completed one of the busiest years since the inception of the division. Personnel have completed 114 Level I investigations, 29 Level II investigations, 13 Level III investigations, five operators licenses, five suppliers, five boat renewals, three transfers of ownership and nine civilian applications.

Each Level I investigation takes an average of 60 hours to complete. A supplier, transfer or renewal application will take approximately 250 hours. The five operators licenses took approximately 500 hours each.

Riverboat Investigation Unit

The RIU is divided into two zones, each having five riverboats. Each zone is supervised by a first sergeant. A sergeant and squad of detectives man each riverboat. Collectively, the RIU investigated 1,021 cases and 331 incidents, which resulted in 631 criminal charges being filed.

Due to the nature of this industry, it is essential to constantly monitor the operations of the boats as well as suspicious activity of patrons. The RIU produced 1,260 intelligence reports, which have proven to be extremely beneficial in the apprehension of criminal activity at the riverboats, as well as aiding the local authorities in solving criminal cases in these areas. An ongoing problem at all the riverboats is underage patrons. This year, 6,323 patrons were confronted or removed from the riverboats. RIU checked 1,658,170 identifications of the 29,019,615 patrons who frequented the riverboats.

Due to the investigative skills of division detectives, the Gaming Commission levied \$1,075,852 in fines to the riverboats for statute violations and noncompliance of internal controls. Additionally, the RIU uncovered a credit card fraud ring operating in multiple states. This investigation led to several arrests and indictments, including an employee of a major credit card company.

LABORATORY DIVISION

*Major
Justus E. Littlejohn
Commander*

The Laboratory Division provides forensic support to all Indiana law enforcement agencies through analytical services in controlled substances, DNA, firearms, latent print, micro-analysis and documents. Crime scene investigations, clandestine laboratory processing teams and polygraph examinations are also an intricate part of the division.

In fact, 81 percent of the cases submitted for analysis in 2004 were submitted by non-state police agencies.

The division has earned accreditation by the American Society of Crime Laboratory Directors/Laboratory Accreditation Board

(ASCLD/LAB). Accreditation demonstrates the laboratory's management, personnel, operations, procedures, equipment, physical plant, security and health and safety procedures meet established national standards. Also, to ensure quality laboratory services, crime scene investigators complete an in-depth training program that covers current laboratory analytical abilities and the proper methods to identify, collect and preserve physical evidence. The laboratory partnered with the Indiana Law Enforcement Training Board to create the first certification program for crime scene investigators in Indiana.

The Clandestine Laboratory Enforcement Team is comprised of laboratory coordinators, forensic personnel and sworn volunteers. Certification maintenance to ensure OSHA and laboratory policies and procedures adherence is an ongoing process.

Auditing is an intricate facet of all areas of the laboratory. Additionally, each crime scene investigator undergoes two technician quality assurance audits yearly and the evidence system at each district and laboratory is audited annually.

Laboratory forensic personnel completed 12,890 cases. Backlogs were reduced in all disciplines except controlled substances and documents.

The Latent Print Unit reduced its backlog by 35 percent while DNA showed a 47 percent increase in case output. House Bill 1001 funding allowed for additional staffing, overtime compensation and outsourcing of cases. Funding from the bill also allowed the laboratory to hire additional forensic DNA, document and controlled substances forensic scientists as well as some support staff.

Crime scene investigators processed 1,653 scenes with approximately one-half of their effort being spent toward supporting state police cases.

The Clandestine Laboratory Enforcement Team saw an increase of 10 percent of illegal laboratories that were dismantled. The state ranked fourth in the nation in 2004 with 1,549 clandestine laboratories reported and of these laboratories, the state police dismantled 1,113.

The Convicted Offender DNA Database (CODIS), which is populated by DNA profiles from selected criminal offenders as prescribed by law, continued to aid investigators with 396 hits/matches as compared to 123 in 2003.

Groundbreaking for the new Indianapolis Regional Laboratory occurred in June. This facility will also house the Indiana State Department of Health and the Department of Toxicology.

Bureau of Support Services

COMMUNICATIONS DIVISION

*Major
John E. Mishler
Commander*

The Communications Division is responsible for the design, specification and repair of communications equipment including fixed, mobile and portable radios, microwave radios, towers, cellular telephones, traditional telephones, pagers, sirens, VASCARS, RADARS, faxes and telephone credit cards. Manpower shortages forced some reduction in services.

The division also coordinates training for all telecommunications operators and monitors the statewide mobile maintenance contract. The department has 53 microwave tower sights across the state. Besides the obvious communication capabilities, this microwave and radio system carries IDACS/NCIC, the ISP WAN, the Laboratory Division's Information Management System (LIMS); provides statewide communication for the FBI at many sites and houses the National Weather Service radios.

Each of the sites has an emergency generator that must be maintained. For the most part, this is an aging system requiring constant maintenance and repair. Maintenance contracts are written, negotiated and monitored. Division engineers, field technician supervisors and field technicians are in constant demand by federal, local and other state agencies to act as consultants and advisors in public safety communication projects.

The Radio Shop supervisor and technicians no longer install mobile radios in department commissions. Installations have been taken over by installers as part of the Logistics Division's effort

to build out new commissions. Radio Shop technicians program radios for the department. Programming has, by far, become one of the divisions primary and most time consuming responsibilities.

Special projects continue to take up a large portion of division resources. They consist of setting up a mobile command post with communication capabilities for events such as the Indianapolis 500, the National Drags and the Indiana State Fair. Special projects may also entail programming a large number of radios for specific uses.

The biggest task of the division has been to keep what communication equipment the department has operational while assisting and advising the members of the Project Hoosier SAFE-T team on the design and build-out of the statewide voice and data communication system. The existing infrastructure must be maintained not only for the short-term but also long-term because much of Project Hoosier SAFE-T will be built on state police sites utilizing department towers and microwave.

During 2004, the Indiana State Police entered into a Memorandum of Understanding with the Indiana Department of Transportation (INDOT) to increase microwave bandwidth by one-third. In return for bandwidth, INDOT provided an ATM layer to the microwave, which will vastly increase the efficiency of bandwidth management. This ATM layer will eventually allow for wireless, teleconferencing and advanced digital communications applications. The rollout of the ATM layer began in early 2004 with a pilot project running from Headquarters to Fort Wayne. This ATM layer is proving to be one of the biggest enhancements to the department's digital communications capabilities since switching from an analog microwave system to a digital system.

INFORMATION TECHNOLOGY DIVISION

*Major
Daniel R. Meek
Commander*

The Information Technology Division provides computer support for hardware, software and operating systems to all department personnel. Employees develop equipment specifications, complete technical portions of procurement documents and identify grants to fund and expand technology resources.

The division also serves as a portal to all Indiana law enforcement through the development and management of the Indiana Data and Communications System (IDACS). IDACS warehouses Indiana criminal information, accesses the Indiana Bureau of Motor Vehicle (BMV) files and secures the state's connection with other state's records and files housed in the National Crime Information Center (NCIC).

The IDACS Section consists of an applications systems analyst staff, trainers, security officers, coordinators and clerical support. Trainers conducted 49 classes with an enrollment of 596 students from various agencies. To facilitate the growing number of users, the staff implemented online training and testing to the IDACS/NCIC 2000 System. The staff conducted specialized training for the Indiana Law Enforcement Academy, the Data Operations Center (DOC) and other judicial and enforcement system user groups. Applications utilized by law enforcement accessing files and data from NCIC, IDACS, BMV and the International Justice and Public Safety Information Sharing Network (NLETS) are maintained by the IDACS staff. In addition to their regular duties, they completed the cut-over from the IDACS legacy system to IDACS/NCIC 2000.

IDACS security officers completed 215 audits, approved 332 locations for additional terminals and issued 14 notices of violations. Federal, state and local agencies, who meet state and/or federal criteria, depend on the system to provide access to all files associated with IDACS and NCIC, including criminal history, protection orders, wanted persons,

stolen vehicles and sexual offenders. During 2004, investigations requiring special searches on the system totaled 31 IDACS and 43 BMV. The number of authorized agencies grew to over 350 and the IDACS users topped 14,000.

The Indiana Missing Children Clearinghouse (IMCC) coordinates information about missing Indiana children. Over 11,560 reports were made on missing children in the state. The IMCC also manages a LOCATER System, a network of computers throughout the state used to assist agencies in researching missing children cases and as a resource to prepare information for dissemination to law enforcement and the media. The IMCC oversees the Amber Alert System, a tool for officers to enhance child abduction investigations when enough information is available that will allow the public to immediately and actively participate in a search. Twenty-five requests were made for Amber Alert activations, while seven actual alerts occurred, locating 11 children. To improve training and Amber Alert activations, the IMCC staff was awarded a grant from SBC to be used for training material and update technology resources.

The Data Operations Center (DOC) is manned 24 hours a day. The DOC is the helpdesk providing technical support and assisting with operational needs for the department and law enforcement agencies throughout the state and the country.

What sustains the technology for the department is the Computer Support Section (CSS). The average size of the CSS staff over the past several years has not exceeded five people. The staff is tasked with managing servers for headquarters and districts, including files, printers, e-mail, paging, fleet and the lab. Additionally, preparation of equipment specifications, procurement, deployment, troubleshooting, repair and general application updates and training are all conducted by this staff, which operates at a ratio of over 500 devices to one staff member. CSS is also responsible for coordinating the Mobile Data Terminal System, managing the department's Intranet applications and overseeing system integrity and security designed at preventing and dealing with viruses and infected systems.

LOGISTICS DIVISION

*Major
Timothy J. Harte
Commander*

The mission of the Logistics Division is to provide the services of procurement, disposal, maintenance, repair, distribution and inventory control of department facilities, equipment, supplies and services. This mission is accomplished through the efforts of the following sections.

Automotive Section

The Automotive Section purchases, equips, maintains and disposes of vehicles in the state police fleet. Over 1,800 vehicles are readied and in a large part maintained and repaired by seven mechanics, seven installers and three supervisors. Some of the section's accomplishments include:

- Equipped 306 new vehicles and issued 286.
- Installed mobile digital 800 MHz radio systems in patrol vehicles assigned to Districts 11, 13, 14, 16, 22 and 24.
- Equipped and issued 17 Harley Davidson motorcycles.
- Equipped 10 bomb trucks.
- Transferred the automotive and installation parts rooms from the Quartermaster Section to the Automotive Section.

Engineering Section

The primary responsibility of the Engineering Section is preventive maintenance. All engineering employees work on 24-hour callout system and respond to numerous calls for service. The section routinely maintains 92 buildings throughout the state with eight maintenance repairpersons and two supervisors. In addition to routine maintenance, the section performed an assortment of tasks, ranging from constructing storage buildings and woodworking to snow removal and grounds keeping. Personnel also coordinated the installation/replacement/construction of:

- Roofs at Districts 13 and 16, as well as Logistics.
- Roof, guttering and downspouts at Districts 34 and 54.

- A heat pump at the ISP Youth Education and Historical Center.
- Fire alarm systems at Logistics, Indianapolis Regional Lab, as well as Districts 13, 14, 16, 22, 24 and 51.
- Gas pumps at Districts 14, 35, 45 and Logistics.
- The gate operator unit at Logistics.
- A hoist in the Logistics' Division Garage.
- An overhead garage door at District 45.
- The construction of the DNA Laboratory at District 35.
- The refurbishment of the boiler stack at Districts 24 and 51.
- Asphalt resealing and coating at Districts 16, 24, 25, 33, 43, 45, 51 and the Logistics Division.

Additional responsibilities included maintaining both the Indiana State Police Memorial and Eternal Flame and the ISP/INDOT building at the 21st street complex.

Support Asset Management System Section

The Support Asset Management System (SAMS) is the computerized data system used to provide support for all the sections within the Logistics Division. This system affords the division the ability to track all state police equipment, supplies and assets from the acquisition to disposal. It also provides the ability to maintain a history of all transactions that occur with a specific item. Some of the accomplishments include:

- Maintained a fuel audit procedure to ensure accurate meter readings.
- Processed all "Lost or Damage Equipment" reports.
- Audited all ISP assets located at district facilities.
- Inventoried all weapons located at the Logistics Division.
- Maintained the department inventory tracking system through SAMS.

Print Shop

The Print Shop, operated by two employees completes the bulk of all department printing. Utilizing the Print Shop, keeps costs within budget and promotes efficient operation. Some of the major accomplishments for 2004 include:

- Printed special details publications.
- Printed the participant copy of the Crash Report forms for all agencies within the state.
- Produced forms for the Central Records Division.

Purchasing Section

The primary responsibility of the Purchasing Section is the acquisition of all goods and services and is accomplished through the efforts of four employees. The purchasers, in addition to the normal procurement processes:

- Purchased clothing and equipment for the Government Facilities Unit.
- Purchased all clothing and equipment for the units assigned to the Motorcycle Program.
- Designed the emergency lighting and radio placement and graphics for the motorcycle program.
- Received 100 percent compliance rating from IDOA in the area of purchasing, which was instrumental in maintaining the current purchasing authority.

Quartermaster Section

Quartermaster is responsible for inventory control of department assets, equipment and supplies. Items ordered by Purchasing are delivered to, stored, issued, tracked and disposed of by Quartermaster. In addition to the routine inventory control process, Quartermaster:

- Audited/inspected all department personnel assigned equipment and replaced where necessary.
- Surplused items no longer serviceable.
- Issued equipment to the 64th Recruit Academy.

RECORDS DIVISION

*Major
Fred C. Pryor
Commander*

The Records Division continued to be responsible for collecting, maintaining and disseminating criminal history data on adults and juveniles within the state charged with a felony or Class A misdemeanor. Central Records Section processed 446,153 criminal history requests.

The Records Division is responsible for enforcing provisions of the Title 1935 Firearms Act as it relates to handgun sales, dealer licensing and permits to carry a firearm. The Firearms Section processed over 69,000 applications for licenses to carry a handgun and held over 700 revocation hearings rescinding 648 licenses.

The Automated Fingerprint Identification System (AFIS) Section now has 74 Livescan equipped booking agencies, which submitted over 140,000 electronic fingerprints for processing during 2004. Latent fingerprint examiners made approximately 240 latent hits on prints submitted for examination. The section submits fingerprints electronically to the FBI and has just completed a \$1.5 million upgrade, including software and equipment.

The Vehicle Crash Section just completed the first full year of electronic records collection and processed just over 206,000 crash reports. This section collects crash information from all law enforcement agencies throughout the state. Crash statistics are available within minutes after data entry for enforcement and statistical purposes. This section is also responsible for the state's Fatality Accident and Reporting System (FARS). Personnel track all fatal crashes throughout the state and collect information for press releases and required statistical purposes.

The Central Records Section processed over 140,000 requests for limited criminal history checks during 2004. This section is also responsible for processing federal background checks and tracking criminal arrests and dispositions. Requests for records expungements are received and reviewed in this section.

Bureau of Field Operations

COMMERCIAL VEHICLE ENFORCEMENT DIVISION

*Major
Edward A. Reuter
Commander*

The Commercial Vehicle Enforcement Division's (CVED) primary mission is to increase highway safety, reduce the number of Commercial Motor Vehicle (CMV) crashes and gain compliance by enforcing Indiana truck and bus laws, federal motor carrier safety regulations and hazardous materials regulations.

CVED personnel conduct safety inspections on equipment, drivers and carriers. Enforcement efforts are supported with a continuing partnership with the Federal Motor Carrier Safety Administration (FMCSA) and their Motor Carrier Safety Assistance Program (MCSAP).

The 87 division motor carrier inspectors (MCI's) focus on non-moving violations, while 31 division police personnel concentrate on CMV drivers who commit moving violations. Along with the division's police personnel, 80 non-division troopers are certified to complete CMV safety inspections.

During 2004, MCSAP certified troopers and MCI's completed 54,329 inspections, identifying 155,831 violations, of which 21,782 placed the driver or vehicle out-of-service.

The division partnered with neighboring states in coordinated enforcement efforts, resulting in the MINNOH (Michigan, Indiana, and Ohio) and KIITE (Kentucky, Illinois, and Indiana Truck Enforcement) projects. Approximately 40 troopers and MCI's worked these projects, resulting in hundreds of discovered violations.

The division's relationship with the Indiana Department of Revenue (IDOR) has allowed for several technological upgrades, including the

replacement of 110 laptop computers. The new computers, leased with IDOR, ISP and FMCSA funds, will allow MCI's and troopers to have wireless connectivity to division resources, resulting in timely and accurate information regarding a driver's safety profile and violation history.

The division continues to participate in New Entrant Safety Audit and Compliance Review programs. The New Entrant Safety Audit gives new companies the opportunity to be educated by personnel regarding the proper administrative and operational methods to follow for FMCSA compliance. A \$900,000 grant from FMCSA has allowed the division to fund computers, cars and personnel costs related to the new entrant program. The Compliance Review Squad investigates companies who do not conform to the established state and FMCSA regulations for safe operation.

Working with the Indiana Department of Transportation (INDOT), the northbound Interstate 65 scale facility in the Seymour District was remodeled, resulting in a safer, more modern facility for MCI's to conduct business.

School bus inspections continue to be a high priority. District troopers assisted with the school bus inspections, thus allowing continued routine motor carrier operations. Personnel conducted 14,725 inspections during annual school bus inspections. Personnel conducted 1,148 inspections on buses 12 years old or older, which are required to have semi-annual inspections and also carried out thousands of spot inspections. Additionally, school corporations' records were reviewed to ensure compliance with required alcohol and drug testing for CDL drivers.

CVED and district personnel conducted a record-setting 576 superload escorts. These loads consisted of bridge beams, large generators and houses. Many of this year's loads facilitated the construction of a new laboratory at Eli Lilly's Indianapolis complex. IDOR's Motor Carrier

Services Division and INDOT work very closely with department escort personnel by issuing over-size permits and identifying proper routing for oversize loads.

FIELD ENFORCEMENT DIVISION

*Major
Thomas E. Melville
Commander*

The division performs staff functions for the Deputy Superintendent of Enforcement and is comprised of three sections: Aviation, Field Operations and Government Facilities Unit.

Aviation Section

The primary function of the Aviation Section is to provide air support for law enforcement and other agencies across the state.

The mission of the section is to offer traffic enforcement assistance, fugitive and victim search and rescue, criminal surveillance, aerial photographic services, airborne command and control functions and disaster assessment and assistance.

The department's Marijuana Eradication Program is housed at the section. This program strives to locate, eliminate and prosecute for both indoor and outdoor growing of marijuana.

Field Operations Section

The Field Operations Section consists of grant management, special enforcement project management, INDOT construction worksite patrols, 24-hour Operations Center and numerous special details.

Officers work off-duty on federally funded grant projects and highway construction zones. These grant monies are directed through the division, which monitor statistical data.

The Operations Center functions with one sworn officer and seven clerical staff. The center's duties are to act as liaison between the field and General Headquarters, disseminating information

to the public and department commanders. Other state agencies requiring 24-hour telephone response use the Operations Center for fielding after-hours calls. The Operations Center is the focal point for police agencies nationwide to request BMV digitized drivers' photographs. The center processed 9,856 images in 2004. It also is the point of contact for both Indiana and surrounding state agencies when requesting an AMBER ALERT, activating seven alerts in 2004. The Operations Center also assists the Records Division in processing background checks through the National Instant Checks System (NICS) on individuals purchasing handguns. The Operations Center conducted 5,344 NICS checks.

The division is responsible for coordinating the training and equipment needs of department specialty teams. These teams consist of the Emergency Response Teams (ERT), Explosive Ordnance Disposal Teams (EOD), Hostage Crisis Negotiations Teams (HCN) and the Underwater Search and Rescue Teams (USRT). The teams conducted the following number of operations during 2004:

Emergency Response Teams	30
Explosive Ordnance Disposal Teams	106
Hostage Crisis Negotiations Teams	10
Underwater Search and Rescue Teams	44

Government Facilities Unit

The Government Facilities Unit is responsible for providing protection and law enforcement for the Statehouse, the Indiana Government Center, the White River State Park, the Governor's residence and approximately 80 state agencies throughout Indianapolis. This enforcement reaches to over 40 locations throughout the state. The Government Facilities Unit personnel initiated 151 cases, made 124 medical runs and unlocked 191 vehicles.

NORTH FIELD OPERATIONS

*Captain
Larry R. Rollins
Commander*

North Field Operations (NFO) encompasses 39 counties in the seven northernmost districts of the state. Northern Indiana is the home to Notre Dame, Purdue, and Ball State Universities. The department has special working relationships with these universities.

The NFO ERT was activated for 14 operations in 2004. Five were for barricaded gunmen where shots had been fired and another was barricaded with a knife. The other eight operations were for high-risk warrants and support for other teams. On one occasion, NFO ERT assisted when a gunman had exchanged gunfire with police officers. The gunman had been hit and hid in a wooded area. ISP and Steuben County SWAT successfully apprehended the suspect without further injury.

The EOD had 50 operations during 2004. On one operation, EOD personnel were called to investigate a vehicle explosion. The roof and contents inside the car were heavily damaged. It was discovered the owner had purchased legal chemicals over the Internet and blew the vehicle up himself. The explosion was heard three miles away. Investigators are working with federal authorities in an attempt to better regulate the chemicals.

NFO divers responded to approximately 20 dive operations. These divers are experts in underwater crime investigation. During an investigation in Adams County, divers located a vehicle submerged in eight feet of water. Upon examination, a body was discovered. They immediately began handling the area as a crime scene and used their skills learned in underwater investigation training.

The NFO Marijuana Eradication Team destroyed over 158,472,000 wild plants and raided 15 indoor grow operations with asset seizures of over \$450,000. The team had a total of 57 criminal arrests.

The NFO Methamphetamine Laboratory investigators dismantled over 450 clandestine labs, oftentimes containing extremely hazardous chemicals.

CENTRAL FIELD OPERATIONS

*Captain
Mark E. Hartman
Commander*

Central Field Operations (CFO) includes five districts across central Indiana from the Illinois state line to the Ohio state line. The districts include Connersville, Indianapolis, Pendleton, Putnamville and Terre Haute. The staff is comprised of a captain, a sergeant, and a secretary.

CFO plans and coordinates security at special events in central Indiana. They are: the 500 Mini-Marathon; Brickyard 400; Hulman 100; Indiana Boat, Sport and Travel Show; Indiana State Fair; Indianapolis 500 Mile Race; National Hot Rod Association Drag Races and the United States Grand Prix. Additionally this year, administrative, operational and command support were provided by CFO staff during a vice-presidential visit, disaster relief efforts in Jamestown following a tornado, the Marion County emergency preparedness exercise, the development of a "Buffer Zone Protection Plan" at the Indianapolis Motor Speedway and two line-of-duty officers' funerals.

The CFO ERT conducted 10 successful operational details and 16 other operations. These ranged from serving high-risk search and arrest warrants, to handling hostage situations and dealing with barricaded suspects.

In November, a 17 year-old male held his mother hostage for a short time and fired shots at officers then barricaded himself in his home. ERT members contained the juvenile for 10 hours while hostage crisis negotiators talked the man out of the house.

In December, a suspect with a violent criminal record barricaded himself with two females in a Sullivan County apartment. The suspect told police, who had arrived to arrest him on a warrant, that he was armed with firearms and a bomb he would detonate and "kill everyone" if they made further attempts to arrest him. Again, the CFO ERT members responded. They first evacuated the area and took up containment positions. After three hours, one female was released. Finally,

after six hours of negotiations, the other female and the suspect surrendered safely to ERT personnel.

The CFO Marijuana Eradication Team completed another successful year. Assigned troopers were diligent in eradicating outdoor marijuana plants and investigating indoor grows throughout the region. Combining indoor and outdoor grow investigations, the CFO team eradicated 1,932 marijuana plants, made 249 criminal arrests and seized over \$1,497,000 in equipment and cash.

In late April, the Indianapolis eradication units, interdiction units, Indianapolis Police Department and U.S. Customs served several search warrants on residences of a suspected indoor growing ring in the Indianapolis area. After simultaneously hitting several locations, an elaborate indoor grow was located netting nearly 500 marijuana plants. After several hours of investigation, over \$300,000 was located buried in the suspect's backyard. The cases netted several arrests and seizures of several vehicles, cash, equipment and homes.

SOUTH FIELD OPERATIONS

*Captain
William A. Walls
Commander*

South Field Operations (SFO) encompasses 32 counties in southern Indiana. SFO has posts in the cities of Bloomington, Evansville, Jasper, Sellersburg, Seymour and Versailles. The purpose of SFO is to provide leadership and management of the six districts and to oversee the operations conducted at those locations.

Southern Indiana cities host many festivals that attract thousands of visitors annually. Very large crowds routinely are in attendance at Indiana University sporting events in Bloomington, the Kentucky Derby fireworks event near Clarksville, boat races at Madison and an air show at Evansville. Most of these events

require the assistance of troopers to insure safety and the efficient movement of traffic.

The common perception of troopers is one of a day spent writing speeding tickets. A more accurate picture is one of SFO troopers working actively in criminal investigation and public service details, as well as traffic enforcement. In every district, troopers are serving on temporary investigator assignments to assist detectives with the heavy volume of cases.

Individual districts conduct the marijuana eradication efforts for SFO. Southeast and southwest regional coordinators assured that programs were consistent and expenditures and statistics were properly maintained. An intense effort made on indoor grow operations resulted in increased numbers of arrests. Several district meth lab teams made very significant impact on the growing problem of illegal methamphetamine production. Meth labs have grown in number annually due to the ease of manufacturing and the relatively low cost of production. The specialized drug enforcement efforts have resulted in many arrests and forfeiture procedures of cash, vehicles and real estate.

TOLL ROAD DISTRICT

*Lieutenant
Dallard R. Tackett
Commander*

Through a formal agreement with INDOT, the Toll Road District is the sole law enforcement provider for the Indiana Toll Road. Services are provided on a 24-hour basis for the entire 157 mile length of the Toll Road and no calls for service are referred to any other agency.

The Toll Road spans the seven northern most Indiana counties. More than 54 million vehicles travel the Toll Road yearly with nine million of those being commercial vehicles. Over the last five years, patrons traveling the Toll Road have increased each year at an average rate of 4.8 percent. The generated income of the Toll Road last year was approximately \$95 million.

The continual increase of motorists traveling the Toll Road impacts the district with increased calls for service. Two speed dial phone lines at the district provide 24-hour emergency service to patrons. Calls for emergency service exceed 650 per month.

Besides the patrons traveling on the Toll Road, district personnel provide services to the Toll Road Division's 600 employees as well as the personnel of the various businesses, which operate in the 10 travel plazas across the Toll Road. Excellent working partnerships with these businesses have resulted in a significant decrease in criminal acts occurring at the plazas.

Construction projects and moving maintenance operations occur almost daily on the Toll Road. Special patrols, aircraft utilization and grant funded projects are used in an effort to reduce the number of crashes.

In addition to enforcing state and federal laws, district personnel also enforce the rules and regulations of the Toll Road Authority. Personnel are routinely utilized for traffic control at Notre Dame home football games and protection of dignitaries traveling on the Toll Road.

District personnel continue their effort in criminal and traffic enforcement. The district ranked in the top ten of all districts with criminal cases drawn. During 2004, the Toll Road District handled over 13,000 calls for service. Several drug arrests were made last year. Large amounts of marijuana as well as vehicles were seized.

Personnel are committed to providing public service to the citizens and promoting the department. Troopers assigned to the Toll Road conducted numerous programs and public information functions at local schools, clubs and fairs.

The district is also able to provide other information to the motoring public by utilizing glass-enclosed bulletin boards at all travel plazas. Recruiting, Amber Alert, new laws and other general information is posted for the public to review.

	2002	2003	2004

LOWELL DISTRICT

*Lieutenant
Larry R. Keiser
Commander*

The Lowell District is comprised of Jasper, Lake, LaPorte, Newton, Porter, Pulaski and Starke Counties in the northwest corner of the state. The district covers an area of 3,218 square miles with a population base of over 820,000. The northern counties in the district are bordered to the north by Lake Michigan

and the State of Michigan and to the west by the Chicago metropolitan area and the State of Illinois. The southern counties in the district are less densely populated and consist mainly of farmland and rural communities.

The district is home to the Dunes National Lake Shore and the Dunes State Park as well as a number of large steel mills. Five gaming boats, which generate millions of dollars for local communities, are also located in the district.

The staff at the Lowell district consists of 60 enforcement and 15 civilian personnel. Detectives, motor carrier officers and the Lowell Regional Laboratory also support the district. Six correctional facilities, Camp Summit Juvenile Facility, Lakeside Correctional Facility, Maximum Control Complex at Westville, Medaryville Correctional Facility, Michigan City State Prison, and Westville Correctional Center, are located in the district.

District troopers patrol over 100 miles of interstate highways with Interstates 80 and 94 crossing the district east and west and Interstate 65 bisecting the district north and south. Through special enforcement projects, troopers target hazardous moving violations on Interstates 80 and 94 throughout the year. Annually, personnel provide over 3,000 public services to motorists throughout the district.

The district experienced the beginning of a four year construction project on the Borman Expressway (Interstate 80/94), which includes the addition of a fourth lane in each direction and reconfiguration of interchanges. The construction runs from March through November and presents the district with challenges in facilitating traffic movement.

Three troopers continue to serve on two federal task forces operating in the metropolitan areas of Lake County. Ten district troopers are temporarily assigned to the Gaming Enforcement Division to serve on one of the district's five gaming boats.

Annually, a team of 10 troopers participate in the National Police Challenge 50 Kilometer Relay Race in Washington D.C. The race, sponsored by the U.S. Secret Service, supports Concerns of Police Survivors (COPS), a national organization dedicated to supporting the loved ones of police officers who were killed in the line-of-duty. This year, the team ran in memory of Trooper Scott A. Patrick who was killed in the line of duty on December 22, 2003.

LAFAYETTE DISTRICT

*Lieutenant
Douglas A. Theobald
Commander*

The Lafayette District is composed of eight counties, which include two major interstates. The district is the home to Purdue University, Wabash College, Tippecanoe Battlefield and Indiana Beach Amusement Park.

To deter the manufacture and use of methamphetamine, personnel and local law enforcement agencies conducted surveillance at farm fertilizer facilities that store anhydrous ammonia. The district's efforts resulted in 66 meth labs being dismantled.

Marijuana eradication troopers seized 1,559 indoor-cultivated plants from nine indoor grow operations and 2,195 outdoor cultivated plants from 65 outdoor plots. Over 123,000 wild marijuana plants were seized and 64 criminal charges were filed.

Troopers used non-structured duty time to locate and arrest individuals wanted on various criminal warrants. Their efforts resulted in 161 individuals being arrested. Troopers also assisted the Tippecanoe County Drug Task Force, a joint effort between the county's law enforcement.

The district participated in the "Click It or Ticket" campaign in May. Personnel conducted 45 seat belt enforcement zones during a two-week period and continued seat belt/child restraint enforcement throughout the year. Troopers also conducted specialized patrols addressing impaired driving, commercial motor vehicle violations, aggressive driving, school bus stop arm violations and habitual traffic violators.

In September, the district hosted a Child Safety Seat Inspection Station to increase awareness about the proper installation and usage of car seats. Fifty inspections were completed and 16 car seats were distributed.

Personnel conducted several educational and recruiting programs. The "Every 15 Minutes" program, which educates high school students about the dangers of operating a vehicle while intoxicated, was presented at a local high school. District personnel partnered with the Coalition for a Safe and Drug-Free Tippecanoe County in hosting several hundred fifth-graders in a simulated field sobriety test, which included interactive displays discouraging the use of drugs and alcohol. Recruiting programs were also presented at several high schools and two career days at Ivy Tech State College.

Personnel, working with state and federal agencies, participated in two drug seizures initiated from traffic stops. The first stop involved a semi-tractor trailer and netted 265 pounds of marijuana. The second stop involved a sports utility vehicle with 21 kilos of cocaine being seized.

The district and Lafayette Police Department initiated a Media Information Exchange (MIX) program designed to maintain good working relationships between law enforcement, media and other public safety officials. All local law enforcement agencies and both print and broadcast media were involved.

For the fourth year, the district hosted the "Cops 4 Kids" program at Christmas. The eight local Division of Family and Children offices in the district selected needy children. Several enforcement personnel interacted with the children by helping them shop for themselves and their families. A total of 25 children benefited from this program.

	2002	2003	2004		2002	2003	2004
Traffic Arrests	18,146	13,654	12,090	Crash Arrests	279	181	149

PERU DISTRICT

*Lieutenant
Edward C. Schroder
Commander*

The district is located in north central Indiana and encompasses six counties. The Peru Circus City Festival, Tipton County Pork Festival, Brass Ring Festival in Logansport, Round Barn Festival in Fulton County and Wabash Canal Days are the larger festivals conducted within the district.

The district continues to utilize its public information trailer. The trailer affords officers an opportunity to communicate with area citizens on a one-to-one basis. The district conducted 204 PIO programs, 88 of which were initiated by officers involved in the district "Adopt-A-School" program. This program has allowed officers to develop excellent relationships with students and school personnel. Troopers also conducted 679 walk-through details in conjunction with the "District School Walk-Through" program.

District personnel coordinated a program known as "Law Day," presented at Grissom Air Reserve Base, to area sixth grade students in Miami County and the Southeastern School Corporation in Cass County. The 600 students who attended the daylong event were able to view exhibits and meet with representatives from various law enforcement agencies. Agencies participating included: FBI, Grissom Security Police, Indiana Department of Natural Resources, Indiana State Excise Police, Miami County Sheriff's Department, Peru Police Department, U.S. Marshals Service and specialty teams of the Indiana State Police.

Personnel along with investigators conducted 19 presentations on Clandestine Lab Identification and Safety Awareness to 21 local criminal justice, Fire/EMS and EMA agencies. The district's eight

certified Clandestine Lab Team members responded to 120 methamphetamine labs within the district and another 137 labs outside the six county area.

Officers conducted three district-wide, DWI enforcement D-Day projects. Multiple saturation patrols were conducted simultaneously throughout the district. Officers executed four District Truck Enforcement days, bringing together personnel from the district, the Commercial Vehicle Enforcement and Criminal Investigation Divisions. An emphasis was placed on moving truck arrests for such causation factors as speeding, following too closely and improper lane changes.

This district is home to three Department of Corrections facilities and a state hospital. The Miami County Correctional Facility is a medium-security prison holding over 3,000 offenders. The Logansport Juvenile Facility and the North Central Juvenile Facility are located in Cass County. Both facilities house juvenile offenders from throughout the state. Detectives and troopers from District 16 conducted 60 cases at these state facilities.

In an effort to reduce injuries and fatalities from vehicular crashes, the district participated in the "Click It or Ticket" campaign, which placed increased emphasis on seat belt and child restraint violations. Personnel conducted 42 enforcement zones during the campaign and checked 3,426 vehicles, which resulted in 44 seat belt arrests and one child restraint arrest. Increased enforcement resulted in 1,442 seat belt citations and 56 child restraint violations. Four district troopers, who are certified child restraint technicians, conducted numerous child restraint seat inspections at festivals and child safety events. They also assisted the Peru Police Department with inspections and installations and distributed new restraint seats at their permanent fitting station.

FORT WAYNE DISTRICT

*Lieutenant
Gary A. Robbins
Commander*

The Fort Wayne District encompasses nine counties in northeastern Indiana and is the largest district geographically in the state. It also contains the state's second largest city, Fort Wayne. Annually, troopers respond to more than 13,000 calls for service in addition to their road patrol duties. A great number of lakes, reservoirs and

popular state parks are located in the district, which causes the population to swell with tourists and summer residents.

The Auburn Cord Dusenburg Festival, Bluffton Street Fair, Huntington Heritage Days, Johnny Appleseed Festival, Shipshewana Flea Market and the Three Rivers Festival are hosted annually in the district. The Kruse Celebrity and Collector Car Auction is held in conjunction with the Auburn Cord Dusenburg Festival. Many celebrities bring their collectible automobiles to this world-renowned event to be auctioned. Over 500,000 spectators attended this annual Labor Day Weekend event.

In addition to their regular duties, enforcement personnel conducted specialized patrols targeting aggressive drivers, operating while intoxicated, commercial motor vehicle and passenger restraint violations. Quarterly crash statistics were utilized to identify locations in each county where frequent and severe crashes occurred. Specialized patrols were then assigned in these locations targeting causation violations, which have resulted in a significant reduction in crashes at these locations.

During the summer months and into the fall, two district troopers concentrated their efforts on the eradication of marijuana. With public cooperation, these two troopers seized several major indoor grow operations, including growing equipment and thousands of cultivated marijuana plants that resulted in 179 charges on 54 suspects.

In order to address the growing methamphetamine problem in Noble and LaGrange Counties, two troopers assigned to that zone have taken a proactive approach. They have begun the Interdiction Criminal Enforcement (ICE) program in their area. Part of the program revolves around educating businesses and citizens on signs in their neighborhood, which may indicate that drug dealing or methamphetamine manufacturing is occurring. These individuals are encouraged to call in tips for the troopers to investigate. The program began in December and has already resulted in raids on two locations and one arrest.

In April, the district launched the "Stay Focused" program, a safe hands-on approach to show young drivers the real dangers of drinking and driving. In the program, funded by the Drug and Alcohol Consortium of Allen County, participants operate a specialized golf cart through a series of obstacles. After successfully negotiating the obstacles unimpaired, the participant then wears a pair of Fatal Vision Goggles, which distort one's vision similar to one who has been drinking. The program has been very successful allowing the participants first hand knowledge how altering one of their senses could have life changing consequences if they were operating an automobile on the open roadway.

BREMEN DISTRICT

*Lieutenant
J. Bradley Weaver
Commander*

Bremen District encompasses four counties in north central Indiana. The district serves over 400,000 Hoosiers in a variety of communities from the growing commercial areas in Marshall and Kosciusko Counties to well-established industrial sections in St. Joseph and Elkhart Counties and the prominently agricultural Amish areas in Elkhart and Kosciusko Counties.

In addition to normal traffic and criminal enforcement and public relations, the district personnel completed several special details. Every year, the troopers from Bremen District partner with other law enforcement agencies in St. Joseph County to provide traffic control for six University of Notre Dame home football games. Personnel also assist with security planning and traffic direction at the annual Blueberry Festival in Marshall County held on Labor Day weekend. The festival has an attendance of over 500,000 people. Personnel are also an integral part of the security for the Elkhart County Fair, ranked as the third largest such event in the United States.

Personnel also assisted with security planning and traffic direction during two vice-presidential visits and one presidential visit and other dignitary visits during the course of the year.

Working with other agencies, troopers in the Marijuana Eradication Program placed more emphasis on early eradication, surveillance of cultivated plots and indoor grows. The district eradicated 1,085 cultivated plants, 16 indoor grow operations and arrested 248 suspects.

Troopers coordinated efforts with all district police agencies to positively impact clandestine laboratory criminal activities. The outcome of this concentrated effort significantly impacted the incidents of clandestine lab activity in unincorporated areas. In one instance, troopers working marijuana eradication uncovered several clan labs that synthesized methamphetamine using a method previously unknown to police.

The Criminal Investigation Division and district troopers were asked to examine several cases from the St. Joseph County Prosecutor's Office, Elkhart County and Argos Police Departments. These cases ranged from murder, police action shootings and official misconduct to investigations of child abuse.

District troopers joined efforts with members of other police departments to reduce DUI violations. Several saturation patrols were conducted during peak DUI periods. Special holidays and areas that were known to produce DUI violations were also targeted. In conjunction with the Mishawaka, Syracuse and North Webster Police Departments, these saturation patrols produced not only several DUI arrests and convictions, but a positive response from citizens.

Personnel initiated aggressive driving enforcement and education campaigns. Aggressive driving self-evaluation and informational brochures were prepared and distributed to local high schools and driver's education classes. Additionally, local television and radio stations partnered with troopers to champion various traffic safety promotions including aggressive driving, the stationary failure to yield law and safety belt compliance.

REDKEY DISTRICT

*Lieutenant
C. Andy Coffee
Commander*

Located in east central Indiana, the Redkey District serves Blackford, Delaware, Grant, Jay and Randolph Counties, which range from agricultural communities to larger urban areas. Three universities, Ball State, Indiana Wesleyan and Taylor, bring a large influx of students into the district.

Several events drawing large crowds occur annually within the district. The annual five-day Tri-State Tractor/Engine Show in Portland attracts over 120,000 exhibitors and visitors each year. The Muncie Endurathon, which is a qualifier for the National Iron Man Competition, attracts over 850 participants and involves the National Guard and all law enforcement agencies in Delaware County. In September, the James Dean Festival/Car Show attracts vintage and muscle car enthusiasts from surrounding states. Blackford County hosts a large Civil War re-enactment.

The district's innovative "School Bus Stop Arm" program continues to grow. School bus drivers continue to provide stop arm violation information, allowing troopers to follow-up and, when appropriate, take enforcement action. During the year, 84 school bus violations were reported, with 53 percent of the complaints resulting in citations.

The district received first place honors and \$4,000 at a November luncheon hosted by the Governor's Council on Impaired and Dangerous Driving. The district was recognized for its outstanding achievement in the "Operation Pullover" program. This money will be used for traffic safety equipment for troopers.

The Marijuana Eradication Program continues with great success. This year the emphasis shifted to eradicating indoor grows. Marijuana eradication units drew 23 cases and shut down 10 indoor grows resulting in 73 criminal arrests, the seizure of 865 plants and other contraband valued at \$68,430.

Redkey personnel provided 307 programs to the public containing proactive information geared for all ages in personal safety, traffic safety and crime prevention issues. The district public information officer continues to present the Identity Theft program statewide. This program has received the attention of several state and federal agencies. The methamphetamine lab and marijuana eradication units speak frequently to local police, fire and EMS departments, as well as high school students about the dangers of these drugs.

In June, the district public information officer attended the annual Uniformed Safety Education Officers Workshop in Atlanta, Georgia. During the five-day event, public information officers from state police, highway and state patrol agencies across the country presented safety education programs in competition. The department was awarded first place for its "Static Fire Program."

Cases drawn by troopers were up 10 percent with a corresponding 10 percent increase in criminal arrests. District troopers and detectives worked several cases during the year. Montpelier, a small community in Blackford County, experienced its first homicide. The investigation resulted in the arrest of a suspect for murder. Other cases involved the crimes of child molesting, welfare fraud, cultivating marijuana and dealing in a Schedule II narcotic drug.

	2002	2003	2004		2002	2003	2004
Traffic Arrests	19,424	17,790	17,238	Crash Arrests	102	95	110

BLOOMINGTON DISTRICT

*Lieutenant
Michael D. Saltzman
Commander*

The Bloomington District serves Brown, Greene, Lawrence, Monroe and Owen Counties. The district contains Indiana's largest university campus, Indiana University. Annual events associated with the university include the annual Little 500 Bicycle Race and traffic direction for the football games and graduation ceremonies. Other major events include the Hilly Hundred Bicycle Race, county fairs and numerous festivals and parades.

District personnel continued using a problem solving approach in their efforts to serve the public. In 2001, personnel began analyzing traffic flow problems and railroad grade crossings in the town of Spencer. District personnel contacted INDOT field investigators and railroad officials and put together a plan to reroute train and vehicular traffic in the town of Spencer. In 2004, that plan took another step toward realization when INDOT received funding for a feasibility study to be conducted in 2005.

In June, the department received a request from the town of Bedford to assist with a labor dispute at a local manufacturing plant. The SFO Tactical Intervention Platoon spent a week assisting the Bedford Police Department when strikers became unruly. This allowed the Bedford Police Department to remain available

to provide service to its citizens, as well as work with state police to maintain order at the plant.

The illegal manufacturing of methamphetamine continued to be the leading criminal problem in the district. With the assistance of area prosecutors, police agencies and tips from local merchants, as well as the general public, troopers continued a proactive program that ran throughout the year. District personnel dismantled 42 labs, seized 95 grams of methamphetamine, over 90 pounds of marijuana, eradicated two indoor grows, seized 33 guns and \$39,795. Personnel also filed 346 felony and 194 misdemeanor charges. Troopers conducted 24 educational programs to various groups on methamphetamine.

District personnel have provided many programs at local schools and businesses to educate the public on such topics as drug usage, seat belt and child restraint use, recruiting and department youth camps. Troopers also put forth extra effort in educating the public on driver safety and made many appearances at high schools and local driving schools.

District personnel continued to work with a local radio station to air "Cop Talk." The weekly radio program airs every Friday and features local troopers and special guests, such as representatives from INDOT, who team up to answer questions and address concerns from the general public.

JASPER DISTRICT

*Lieutenant
Danny L. Price
Commander*

The diversity of the environment and of the people who live in the district are the greatest assets of the seven counties of the Jasper District. Crane Naval Surface Weapons Center in Martin County is one of the world's largest ammunition depots. The district's main corridor is Interstate 64 that runs east and west through the middle of the district.

Troopers have spent the last year identifying and impacting specific community problems. The problem of impaired driving was affected by initiating several special patrols during weekends or events. The concentrated traffic enforcement effort included patrols on state roads and Interstate 64 where complaints have occurred or crashes are an ongoing problem. While the number of traffic fatalities increased slightly in the district from 30 in 2003 to 32 in 2004, alcohol-involved fatalities were down from nine in 2003 to seven in 2004. Patrolling Interstate 64 is always a priority, making it a district goal to pass any given point on the interstate at least every three hours. This year, troopers spent over 2,461 hours on 1,269 organized patrols. With the random patrols included, the district more than met its goal.

The confiscation of drugs from traffic stops, warrant services and other investigations is a problem that takes an incredible amount of time, none more so than the investigations into clandestine methamphetamine drug labs. State and local

police located a total of 76 of these labs requiring activation of the state police lab team. One way of impacting these labs was to attempt to catch suspects as they stole ingredients needed to make methamphetamine. By conducting surveillance on businesses, troopers were able to make multiple arrests resulting in 33 criminal charges, 19 of which were felonies.

Troopers continue to work with school systems to combat the problem of drivers who disregard school bus stop arms. Enforcement personnel spent nearly 100 hours investigating 46 complaints.

Troopers made numerous public appearances for schools and civic groups to promote safety and self-compliance with the law. Thousands of citizens attended those appearances on a variety of topics including gun safety, illegal drug use, school bus safety, stranger danger and crime prevention.

Special accomplishments by individual troopers included a trooper in Crawford County who executed a search warrant and discovered several pounds of marijuana, illegal pills and numerous illegal weapons. ISP divers discovered the body of a missing Orange County man in a vehicle in the Ohio River in February. The body of a missing Perry County man was also located in the Ohio River near Derby in November. While divers were searching for his vehicle near the area where he was found, they not only found his vehicle, but another vehicle belonging to an elderly woman who had been missing for over two years. Her remains were in the vehicle.

EVANSVILLE DISTRICT

*Lieutenant
Dennis E. Marshall
Commander*

Evansville District is located in the southwest corner of the state and consists of Gibson, Knox, Pike, Posey, Vanderburgh and Warrick Counties. It encompasses rural communities with farmland and river bottoms, to metropolitan areas such as Evansville, Princeton, Petersburg, Newburgh, Mt. Vernon and Vincennes.

One of the largest visitor based events was the annual Evansville Freedom Festival. Several thousand people come to the area for this Hydroplane Boat Race and Air Show. Another large celebration is the Frog Follies held in August at Vanderburgh County Fairgrounds. This event attracts several thousand hot-rod and antique vehicles, which are on display. Troopers and the Aviation Section provided security and traffic control for these events.

During the year, district personnel worked three aircraft crashes. In February, a Cessna single engine plane checking the oil pipeline had to make an emergency landing in rural Warrick County. In April, a medical helicopter transporting a patient in rural Warrick County crashed resulting in one fatality. In May, two F-15 fighter jets crashed over Knox County resulting in one fatality. It took several days to collect the evidence in this case and provide security for the large scene.

Personnel assisted the Criminal Investigation Division with three homicides, all of which resulted in arrests. They also assisted drug enforcement personnel on investigations. The district assigned one

trooper to the DEA Task Force based in the Evansville area for the first time in several years. This collaboration has helped the district and federal authorities make several arrests and conduct drug-related investigations.

Personnel conducted saturation patrols and focused individual efforts on DUI patrols. Evansville District had two of the top 15 DUI arrests producers in the state. This is the second year in a row that these two troopers were in the top 15.

The latter part of August brought to the district a strong thunderstorm with heavy winds. These winds caused the communication tower to blow over as well as several power poles in front of the post. As the tower blew over, it caused damage to several vehicles and the microwave building on the parking lot. The lack of the tower caused major communications problems for the district. Due to the dedication and professionalism of the personnel at the district, the staff has been able to adapt to the problem and still provide quality service to the citizens.

December brought record snowfall to the district. A state of emergency was declared because of the 20 plus inches of snow, bringing 25 miles of Interstate 64 to a halt. Several motorists were stranded on the interstate until Indiana National Guard vehicles occupied by troopers and guardsmen arrived to assist in transporting them off of the interstate. The community pulled together in a time of need and supplied shelter, meals and transportation for several hundred people as well as road clearing equipment from the local farmers.

VERSAILLES DISTRICT

*Lieutenant
Marty D. McKinney
Commander*

The Versailles District serves Dearborn, Decatur, Jefferson, Ohio, Ripley and Switzerland Counties in south-eastern Indiana. The district facility and garage provides contemporary office and storage space for troopers, investigative, laboratory and civilian staff. The training and conference facilities are used by

department members as well as other local agencies and groups.

The district is home to Hanover College and the Versailles State Park. Three gaming boats which generate millions of dollars for local communities are also located in the district.

Troopers at the Versailles District continued to investigate increasing numbers of methamphetamine related crimes. District troopers investigated 40 methamphetamine clandestine labs, which was a significant increase from the 16 found during 2003. Although this number might seem small when compared to other areas of the state, it represents the steady and predictable growth of this criminal and environmental problem. Similar increases were also noted in precursor violations and thefts of anhydrous ammonia.

At the Versailles District, troopers conducted significant criminal investigations in the six counties and continued to work closely with the assigned field detectives in the district. Troopers investigated the child victimization cases reported to the post.

Troopers continued to make important drug seizures, conduct traffic enforcement and be effective in marijuana eradication efforts. In January, quick acting troopers investigated and quickly solved an armed robbery of a liquor store in Ripley County. Earlier that same month, a suspect in Decatur County was arrested for three counts of attempted murder after he shot at a trooper and two other police officers with a high-powered rifle. One of the shots struck a tree near the responding trooper's head.

Despite a decrease in patrol hours at the district, a continued reduction in crash investigations and traffic fatalities was recorded for the year. In December, troopers worked long hours for several days with the Indiana National Guard assisting stranded motorists who had been caught in the grip of a major snowstorm that dumped over two feet of snow in southeastern Indiana.

In addition to normal patrol and investigative activities, troopers from the district provided law enforcement services for two major tourist events in southeastern Indiana, the National Muzzle Loading Rifle Association Championships, in appropriately named Friendship, Indiana and the Madison Regatta in Jefferson County. Troopers were also involved in school safety commissions, driver education programs, hunter safety classes and other informational and educational projects within the various communities of southeastern Indiana.

SEYMOUR DISTRICT

*Lieutenant
Mark R. Davis
Commander*

The Seymour District serves and protects the citizens of Bartholomew, Jackson and Jennings Counties. The main routes of travel through the district are Interstate 65, U.S. 50 and U.S. 31.

The district is about community involvement. Some of the activities conducted at the post annually include: Visit with Santa Claus, Trick or Treat and the Easter Egg Hunt. Personnel participated in "Cops 4 Kids" and delivered gifts to children to brighten their Christmas. The weekly "In-Lunch" program allowed grade school students a chance to meet and eat with troopers and tour the post.

Troopers presented programs in local schools throughout the year and participated in liaison meetings with school officials. Personnel began participating with the "Big Brothers/Big Sisters Mentoring" program and partnered with the Bartholomew County Probation Department during their home visits.

Two troopers from the district were honored during the year. In February, Sergeant Brian Wilson was named 2004 Officer of the Year by the Brownstown Exchange Club. In October, Trooper Richard Roseberry was presented with a Lifesaving Award by the Jackson County Chapter of the American Red Cross for performing abdominal thrusts on a choking man. Trooper Roseberry's quick action was able to dislodge the blockage and he was credited with saving the man's life.

Traffic enforcement focused on aggressive drivers and pursued those who violated passenger restraint laws. The zero tolerance against noncompliance has increased the usage of seat belts and in turn saved lives. Troopers evaluated locations with a high volume of crashes. Working with INDOT and assigning specialized patrols, personnel worked to reduce contributing factors of crashes in recognized areas.

Troopers continued their efforts to protect children from injuries in vehicle crashes. The district's Permanent Fitting Station is designed to educate individuals on how to properly install child restraint seats in vehicles. This program also provided nine restraint seats to qualified families.

Troopers continued their enforcement efforts to shut down clandestine labs. In May, four subjects manufacturing methamphetamine barricaded themselves in their residence for six hours before they surrendered to officers. Troopers shut down over 33 clandestine labs and provided programs to local businesses and organizations to educate their employees or members on what to look for and what they could do to help combat the methamphetamine problem.

Troopers continued to investigate all types of criminal activities. Troopers arrested two subjects for burglary, cleared three additional burglaries and recovered numerous stolen articles including weapons. Troopers arrested a Jackson County man who eluded police for several weeks after a warrant was issued on attempted rape charges. The perseverance of several officers prevailed and the suspect was jailed.

	2002	2003	2004		2002	2003	2004

SELLERSBURG DISTRICT

*Lieutenant
James E. Hickerson
Commander*

The Sellersburg District is located in south central Indiana and is comprised of Clark, Floyd, Harrison, Scott and Washington Counties. Two major interstate highway systems, Interstate 65 and Interstate 64, run through the district.

The post has 42 uniform officers working in one of three patrol zones. Sellersburg has traditionally been one of the busiest districts, due to the fact that Interstate 65 has approximately 150,000 cars per day crossing the Kennedy Bridge between Louisville, Kentucky and Indiana. In addition, the troopers working in Clark and Floyd Counties address criminal and traffic issues associated with large metropolitan areas.

An extensive construction project was completed on Interstate 65, which involved the creation of new ramps and widening the interstate from four lanes to eight lanes both north and south bound. This project was completed safely with troopers working overtime hours providing patrols in the construction zone.

Each year as part of the Kentucky Derby Festival, a large fireworks display and air show is conducted on the Ohio River. For this event, over 100,000 spectators visit the Indiana shoreline. Troopers provide foot patrols along the river and operate traffic control points in the area. EOD and the Aviation Section also provide assistance.

In May, an outbreak of severe thunderstorms and tornados occurred in all five counties. Troopers assisted with weather spotting, welfare checks and traffic direction. In December, a record snowfall required troopers to work long hours providing a wide array of police services during the state of emergency. Troopers worked with the National Guard to patrol the roadways, deliver medical supplies and provide emergency escorts. The troopers' efforts won the praise of the local citizens and media for a professional response to life threatening disasters.

Troopers partnered with the Southern Indiana TRIAD, an organization that works to improve the lives of senior citizens, in operating collection points for expired prescription medications. This program keeps potentially dangerous medications from being diverted to illegal use. The district has been a lead agency in developing TRIAD programs to improve the quality of life for senior citizens.

Troopers work closely with local law enforcement and federal agencies to deter and solve crimes. The Meth Lab Team has located and dismantled numerous illegal drug labs. Troopers work overtime in the summer months eradicating marijuana plots and indoor growing operations.

The district is responsive to complaints by local citizens regarding traffic problems and has been successful in conducting traffic enforcement in problem areas. The progress in traffic enforcement goals is graded on reducing traffic complaints. The district often partners with local TV media in ride-along programs promoting safe driving during holiday periods.

PENDLETON DISTRICT

*Lieutenant
Michael H. Lepper
Commander*

Pendleton troopers had another year of providing quality service to the citizens of Indiana. The counties that make up the Pendleton District, Hamilton, Hancock and Madison, continue to be the fastest growing area in the state. The population explosion and the number of motor vehicles on the roadway make for ever-increasing challenges in patrol and service needs. Almost half of the residents commute outside the district to and from work each day. Those motorists travel on Interstates 69 and 70 as well as 4,000 miles of city and county roadways. As a result of these traffic challenges, enforcement personnel have made an added commitment to interstate patrol.

The district is a very diverse mix of urban, commercial and rural settings and has all the advantages and disadvantages those lifestyles may bring. Attractions like Conner Prairie Pioneer Settlement, Geist and Morse Reservoirs, Hoosier Park Horse Track, Mounds State Park, Verizon Music Center and the close proximity to all the Indianapolis sporting events and attractions also makes for a booming residential and business environment. Troopers continue to concentrate on intoxicated drivers, railroad crossings, seat belt and speeding violations.

Pendleton District has trained side-by-side with other law enforcement agencies in active shooter response. Three correctional facilities: the Correctional Industrial Complex, Pendleton

Correctional Facility and Pendleton Juvenile Correctional Facility, continue to operate near the post and are often sources of criminal activity.

Troopers apprehended robbers, burglars and many other criminals by staying alert and diligent in their patrol activities. Troopers continue to reach out and work closely with other agencies throughout the district by attending monthly or quarterly chiefs' meetings as well as becoming more actively involved in organizations like local MADD chapters.

Troopers also foster and maintain close relationships at the street level. All troopers have county radios, which allow them to communicate with other agencies more effectively until the Project Hoosier SAFE-T program is completed. The range is also available to other agencies and stays busy most of the year with federal, state and local law enforcement use.

District personnel work hand-in-hand with other divisions. The Laboratory Division, Crimes Against Children Unit and district detectives all have offices at the post. In addition, Commercial Vehicle Enforcement Division personnel also maintain an office and work with troopers to guarantee the safety of school buses and commercial vehicles within the district.

Troopers at the district continue to provide service to the citizens of Indiana through their specialized training. Troopers voluntarily serve as members of EOD, ERT, HCN, TIP and USRT as well as accident reconstructionists. The district's marijuana eradication efforts have proven effective at shutting down indoor and outdoor growing operations.

INDIANAPOLIS DISTRICT

*Lieutenant
Douglas E. Shelton
Commander*

The Indianapolis District is comprised of Boone, Johnson, Marion and Shelby Counties in central Indiana. The district has some of the busiest highways in the country, which create heavy workloads for the 63 troopers and 20 civilians assigned to the district. Personnel serve a diverse customer base of over a million Hoosiers and work

closely with other police agencies to provide the best police service possible.

District personnel moved into a new facility in January. The building is shared with INDOT's Indianapolis Traffic Management Center. The jointly operated facility greatly enhances public safety response to the interstate system in the Indianapolis metropolitan area. The building hosts a state-of-the-art communications center that allows for real-time viewing of traffic incidents occurring on the interstates around the city.

Traffic enforcement and crash investigations continue to be a major focus for district personnel. District troopers worked many hours targeting hazardous moving violations that contribute to crashes. Troopers focused on aggressive drivers in an effort to reduce incidents of road rage and curtail the number of personal injury and fatal crashes. They also worked many overtime hours of special traffic projects to slow drivers in construction zones on Interstate 70 by the Indianapolis Airport

and along Interstate 465 on the northwest side of Indianapolis.

District personnel assisted with two dignitary protection details this year. Vice President Dick Cheney and Democratic Presidential Nominee Senator John Kerry were in Indianapolis this summer. District personnel helped coordinate and provide security for both men. Additionally, the district deals with hundreds of thousands of visitors each year for the Indiana Black Expo, the Indiana State Fair and racing events held at the Indianapolis Motor Speedway.

Troopers remained active in local schools by conducting public information and safety programs. Troopers participated in school safety committees and "Adopt-A-School" programs. Troopers regularly visited schools throughout the year.

District personnel were assigned to a voter recount in Johnson and southern Marion Counties. Troopers were on hand to ensure laws were followed and to secure ballots so that every vote was counted.

District personnel worked throughout the summer and fall eradicating marijuana in central Indiana. Troopers destroyed 90 outdoor cultivated marijuana plots, which totaled 1,021 plants. Additionally, troopers located 25 indoor marijuana grow operations and destroyed another 1,447 plants. In all, 166 criminal arrests were made involving all the marijuana cases. One case resulted in the seizure of approximately \$250,000 in suspected drug monies.

PUTNAMVILLE DISTRICT

*Lieutenant
George A. Schneider
Commander*

The Putnamville District is comprised of Hendricks, Morgan and Putnam Counties and includes a population of over 200,000 and nearly 3,000 miles of public roadways. The district is home to two state parks, a state forest and four state correctional facilities, each requiring a different level of police support and service.

The district has experienced a great deal of growth in the last 15 years. The rapidly increasing population and all the associated benefits and problems are a challenge for the district.

Fifty-seven employees are assigned to the district, including 44 enforcement personnel and 13 administrative and support people, all working together to meet the goals and challenges of the department.

The district formed a four-man team to combat the problem with methamphetamine labs. The team dismantled 40 methamphetamine labs, made 226 criminal arrests with 110 felony arrests and worked 87 cases on 57 defendants. The group also conducted 71 educational programs for 6,275 citizens.

As a spin-off of the Meth Team's efforts, a second team of three troopers worked together for four months and recovered \$350,000 worth of stolen ATVs, motorcycles and heavy equipment.

Other significant arrests included the apprehension of a man suspected of rape and the attempted murder of a 13-year-old Illinois girl following a

manhunt near Monrovia. In September, troopers arrested a man for phoning in a bomb threat. Also in September, an inmate walked away from the Putnamville Correctional Facility. A nine-hour manhunt ensued before troopers located and returned the inmate.

Each year over the Labor Day weekend, the state police provides traffic direction and security to the participants and spectators attending the NHRA National Drags at Indianapolis Raceway Park in Clermont. The district is the lead agency for coordinating the police service for the event.

District units regularly worked probation searches and concentrated commercial vehicle patrols. Additionally, the district continues to host the "Horse's Mouth" program, which allows troubled students to hear directly from the offenders at the Putnamville Correctional Facility about the consequences of criminal activity. Troopers provide public service programs and participate in the "Adopt-A-School" program, as well as providing driver education, safety and many other programs to students and the public.

Personnel also participate in a large number of departmental programs. The TIP and the ERT draw large percentages of their members from the district. Officers participate in a variety of special details and training assignments, including defensive tactics, firearms, tactical entry, explosive ordinance disposal and the department honor guard.

	2002	2003	2004		2002	2003	2004
Traffic Arrests	11,145	8,409	7,924	Crash Arrests	138	94	80

TERRE HAUTE DISTRICT

*Lieutenant
Brent S. Johnson
Commander*

The Terre Haute District is located in west central Indiana and is comprised of five counties: Clay, Parke, Sullivan, Vermillion and Vigo. Forty-five enforcement officers, along with 12 support personnel, are assigned to the district.

Two state correctional facilities, Rockville and Wabash Valley, as well as the only Federal Death Row Housing Facility and Federal Death House in the nation are located in the district. In June, units assisted the Bureau of Prisons in preparation for the execution of Paul Hammer. A last minute stay of execution, postponed the execution, but an operational plan is still in place.

Methamphetamine and clandestine laboratories continue to be the number one criminal concern at the Terre Haute District. Vigo County ranked first in the state in the number of clandestine labs with a total of 166. The district Methamphetamine Lab Team continued its efforts in combating the increasing problem. Through education of the general public and retail merchants, gathering intelligence, performing follow-up investigations and partnering with local agencies, the team was able to dismantle 123 labs, generate 138 cases and make 309 arrests, of which 236 were felony arrests. Team members spoke to approximately 4,124 people at various programs. The five counties in the district had a total of 296 clandestine labs seizures, which accounted for approximately 19 percent of all labs processed in the state.

The district, along with Drug Enforcement Section personnel and local law enforcement

agencies, coordinated several large narcotics investigations. Those investigations resulted in the seizure of approximately 11½ pounds of crystal methamphetamine and \$16,000 in cash, resulting in 11 Class A felony arrests. The DEA adopted this investigation because of the interstate trafficking in narcotics.

The district continues to excel in its Marijuana Eradication efforts. Through public cooperation and the use of informants, district officers eradicated 6,893 cultivated marijuana plants, an increase of over 52 percent.

In July, district personnel assisted other public service agencies with security and traffic direction during the fourth annual Terre Haute Air Show held at the Terre Haute International Airport. An estimated 100,000 people attended this event.

The district continued to be the lead agency in coordinating "Public Safety Days" at the Honey Creek Mall in Terre Haute. The mall attracts shoppers from west central Indiana and eastern Illinois. This annual three-day event has been the largest special event held by the mall for the past 25 years. The display showcases the department and 20 other emergency service providers and associated groups.

In October, district personnel manned traffic control points and provided law enforcement assistance for the annual Parke County Covered Bridge Festival. An estimated two million people attend the festival annually.

Other accomplishments at the district included planning activities and events with Hoosier Boys' State and continued training for the department's role in emergency response/security at the Newport Chemical Depot.

	2002	2003	2004		2002	2003	2004

CONNERSVILLE DISTRICT

*Lieutenant
James A. Edwards
Commander*

The Connersville District is comprised of Fayette, Franklin, Henry, Rush, Union and Wayne Counties in east central Indiana. Thirty-four enforcement units, five investigative units and a lab technician are assigned to the district. A dedicated and vital civilian staff supports these officers.

The post along with its radio tower is a local landmark in Connersville. The building officially opened in 1938. Age has had its effect, but due to a long history of dedicated maintenance employees, this original structure is still in service today.

This geographic area has distinct portions ranging from flat farmland laid out in precise mile squares to rough, hilly terrain covered with forests. The northern part of the district contains the more populated areas of the district as well as the ever-busy Interstate 70. This major roadway requires constant attention year round due to its high traffic volume. Troopers work closely with other police agencies and INDOT in keeping the interstate traffic moving.

The southern portion of the district contains two state parks, the Brookville Reservoir and the Whitewater State Park. The two parks along with the popular Whitewater River attract many visitors. These recreation areas and adjacent roadways require additional policing efforts during the peak summer months.

In addition to road patrols, troopers are engaged in criminal investigations and public service activities. Troopers gave numerous programs during the year on a variety of topics such as school bus safety, identity theft, vehicular restraint systems and working with at-risk juveniles. Two such programs are the Henry County Youth League and the Juvenile Traffic Court in Knightstown. In the youth league, troopers and other Henry County officers interact with at-risk juveniles in both recreational and informative sessions. In the juvenile traffic court, they work with first time traffic offenders and emphasize the hazards of unsafe driving, alcohol and drugs.

The district continued to see methamphetamine labs increase in the area. Twenty-six labs were located and four additional district troopers received lab training and certification. District troopers gave public information programs about the dangers of meth and trained other emergency agencies in meth lab recognition and response. The trained district units assisted other agencies with the dismantling of labs.

A yearly three-day celebration of Canal Days found troopers directing heavy vehicle and pedestrian traffic in the Metamora area of Franklin County. The roads are easily congested with the influx of visitors for this mid fall event. To add to the congestion, a road restriction on U.S. 52 was present as the result of the road giving way. This required increasing the number of units assigned.

I N M E M O R I A M

**Dedicated in memory of the courageous
Indiana State Police employees who have lost their lives in the line-of-duty.**

1. **TROOPER EUGENE TEAGUE** - Indianapolis, Indiana (Headquarters)
Appointed June 1, 1933, killed on December 20, 1933, in Paris, Illinois, during the capture of members of the Dillinger gang.
2. **TROOPER PAUL V. MINNEMAN** - Logansport, Indiana (Lafayette Post)
Appointed September 1, 1935, killed May 27, 1937, by gunshot while attempting to capture members of the Brady gang.
3. **TROOPER WILLIAM R. DIXON** - South Bend, Indiana (Dunes Park Post)
Appointed September 1, 1935, killed June 28, 1938, by gunshot while attempting to apprehend members of the Easton gang.
4. **TROOPER GEORGE A. FORSTER** - Seymour, Indiana (Seymour Post)
Appointed September 1, 1938, died May 17, 1941, in a traffic accident near Vernon, Indiana.
5. **TROOPER RICHARD F. ENGLAND** - Columbia City, Indiana (Ligonier Post)
Appointed January 20, 1936, died April 22, 1942, of injuries received in a traffic accident near Kimmel, Indiana.
6. **TROOPER HERBERT W. SMITH** - Shelbyville, Indiana (Connersville Post)
Appointed November 2, 1942, killed December 5, 1946, near Shelbyville, Indiana, when fired upon by a traffic violator.
7. **TROOPER ROBERT E. CLEVINGER** - Centerville, Indiana (Connersville Post)
Appointed September 1, 1952, died September 8, 1953, in a traffic crash while pursuing a violator.
8. **SERGEANT HUBERT ROUSH** - Indianapolis, Indiana (Headquarters)
Appointed July 14, 1941, died January 26, 1955, in an automobile crash near Indianapolis.
9. **TROOPER EARL L. BROWN** - Columbus, Indiana (Seymour Post)
Appointed October 16, 1940, killed August 31, 1955, while searching a suspect.
10. **SERGEANT JOHN R. MILLER** - Lafayette, Indiana (Lafayette Post)
Appointed September 1, 1941, died September 5, 1955, in an airplane crash while on Labor Day patrol.
11. **TROOPER DONALD R. TURNER** - Auburn, Indiana (Ligonier Post)
Appointed November 1, 1946, died January 28, 1956, from injuries sustained when he was struck by a passing vehicle as he helped a wrecker operator pulling a car from a ditch.
12. **F/SERGEANT MARVIN E. WALTZ** - New Albany, Indiana (Charlestown Post)
Appointed September 1, 1937, killed March 18, 1957, by gunshot wounds inflicted by a suspected bank robber.
13. **TROOPER WILLIAM R. KELLEMS** - Indianapolis, Indiana (Charlestown Post)
Appointed November 15, 1956, killed September 30, 1957, by gunshot wounds inflicted by fugitives wanted for murder.
14. **TROOPER JOHN H. POWELL** - Otterbein, Indiana (Lafayette Post)
Appointed December 1, 1954, died February 27, 1959, when he was struck by an oncoming vehicle placing an electronic timing device on the roadway.
15. **TROOPER ROBERT J. GARRISON** - Montpelier, Indiana (Redkey Post)
Appointed October 1, 1955, died December 14, 1959, instantly of head injuries sustained in an automobile crash on State Road 67.

16. **TROOPER ROBERT C. GILLESPIE** - Bedford, Indiana (Seymour Post)
Appointed September 1, 1950, died June 8, 1962, of injuries sustained in a traffic crash near Mitchell, Indiana.
17. **TROOPER WILLIAM F. KIESER** - Tell City, Indiana (Charlestown Post)
Appointed Operations Clerk, October 16, 1957, appointed as a Trooper, March 16, 1958, killed March 9, 1965, by gunshot while investigating a suspicious person near Ramsey, Indiana.
18. **TROOPER OSCAR MILLS** - Hobart, Indiana (Lafayette Post)
Appointed September 16, 1955, died April 12, 1966, as a result of injuries sustained in an automobile crash while traveling west on State Road 18 at CR 350 in Carroll County.
19. **TROOPER WILLIAM R. RAYNER** - Greensburg, Indiana (Versailles Post)
Appointed September 1, 1957, killed December 18, 1966, by gunshot inflicted by escapees from a Kentucky state prison in a stolen car.
20. **TROOPER RICHARD G. BROWN** - Lebanon, Indiana (Lafayette Post)
Appointed May 1, 1955, died September 27, 1967, as a result of injuries sustained in an car-truck crash on Interstate 74 in Boone County.
21. **TROOPER ROBERT O. LIETZAN** - Westville, Indiana (Connersville Post)
Appointed August 16, 1961, killed March 30, 1969, by gunshot inflicted by a mentally deranged subject, armed with a rifle, who had been firing at random from a barricaded position.
22. **SERGEANT GEORGE W. CAMPBELL** - Brazil, Indiana (Putnamville Post)
Appointed September 1, 1950, died June 18, 1969, of a heart attack during the arrest of a truck driver who had attempted to drive by the Putnamville truck scales.
23. **TROOPER JOHN J. STREU** - Logansport, Indiana (Schererville Post)
Appointed April 16, 1970, killed February 20, 1971, by gunshot. Marshal John Larimer of St. John, Indiana, was also fatally wounded as the two officers investigated two suspicious subjects behind a school building.
24. **SERGEANT GLEN R. HOSIER** - Logansport, Indiana (Peru Post)
Appointed May 1, 1955, killed April 26, 1971, by gunshot while attempting to apprehend a subject being sought for murder in Peru.
25. **TROOPER WILLIAM J. TREES** - Oakland City, Indiana (Evansville Post)
Appointed September 1, 1968, died June 26, 1972, in an automobile accident while pursuing a fleeing vehicle at a high rate of speed.
26. **TROOPER LAWRENCE B. MEYER** - Sellersburg, Indiana (Charlestown Post)
Appointed September 1, 1968, died February 2, 1974, of a heart attack during a foot pursuit of an escaped prisoner.
27. **TROOPER LEWIS E. PHILLIPS** - Michigan City, Indiana (Dunes Park Post)
Appointed February 27, 1973, died April 16, 1975, as a result of injuries sustained in an automobile crash on U.S. 20 when his patrol car collided with a semi-tractor trailer.
28. **TROOPER ROY E. JONES** - Lapel, Indiana (Pendleton Post)
Appointed October 17, 1976, died July 3, 1979, in an automobile crash while enroute to assist the Markleville Town Marshal.
29. **TROOPER ROBERT J. LATHER II** - Greentown, Indiana (Peru Post)
Appointed December 15, 1974, died July 6, 1982, in an automobile crash while assisting the Howard County Sheriff's Department in the pursuit of a speeding vehicle.

30. **TROOPER STEVEN L. BAILEY** - Richmond, Indiana (Headquarters)
Appointed November 26, 1978, died December 10, 1983, when his weapon discharged while attempting to serve a warrant in Indianapolis.
31. **SERGEANT JOHN E. HATFULL** - Evansville, Indiana (Evansville Post)
Appointed January 28, 1973, killed April 13, 1987, by gunshot while leading the Emergency Response Team into the residence of a suicidal subject in Posey County, Indiana.
32. **MASTER TROOPER MICHAEL E. GREENE** - Thorntown, Indiana (Indianapolis Post)
Appointed June 10, 1976, killed February 5, 1993, by gunshot along Interstate 65 in Marion County, while arresting a person wanted on a warrant.
33. **TROOPER TODD A. BURMAN** - Delphi, Indiana (Lafayette Post)
December 9, 1990, killed July 29, 1993, by gunshot while assisting the Camden Town Marshal with the arrest of a disorderly person.
34. **M/MCI (W/L) RALPH R. REED, JR.** - Plymouth, Indiana (Bremen Post)
Appointed April 16, 1968, died August 3, 1995, when he was struck by a semi tractor-trailer while performing a truck inspection in Plymouth, Indiana.
35. **DNA SUPERVISOR KIMBERLY S. EPPERSON** - Fountaintown, Indiana (Headquarters)
Appointed February 4, 1985, died November 16, 1995, in an automobile crash while enroute to a training assignment at the Lowell Laboratory.
36. **TROOPER ANDREW P. WINZENREAD** - Osgood, Indiana (Versailles Post)
Appointed December 4, 1994, died April 25, 1997, when he was struck by a semi tractor-trailer while assisting a disabled motorist along Interstate 74 in Decatur County.
37. **SENIOR TROOPER J. PATRICK BARTRAM** - Mooresville, Indiana (Putnamville Post)
Appointed December 19, 1987, died March 31, 1998, of injuries sustained in a traffic crash on State Road 144 near Mooresville.
38. **MASTER TROOPER DAVID A. DEUTER** - Angola, Indiana (Toll Road Post)
Appointed April 1, 1972, died July 16, 1998, when he was struck by a semi tractor-trailer while conducting a traffic stop along the Indiana Toll Road in LaGrange County.
39. **TROOPER RICHARD T. GASTON** - Indianapolis, Indiana (Toll Road Post)
Appointed December 13, 1998, died March 4, 1999, when a semi tractor-trailer drove off the roadway and struck the trooper's vehicle, killing him and two people in another car.
40. **TROOPER CORY R. ELSON** - Fort Wayne, Indiana (Fort Wayne Post)
Appointed December 13, 1998, killed April 3, 1999, when a driver opened fire on him with an automatic assault rifle during a traffic stop on U.S. 27 in Decatur.
41. **TROOPER JASON E. BEAL** - Shelbyville, Indiana (Bremen Post)
Appointed December 13, 1998, died January 15, 2000, from injuries sustained when he was struck by a passing vehicle as he helped a wrecker operator, who was pulling a car out of a ditch.
42. **TROOPER SCOTT A. PATRICK** - Wheatfield, Indiana (Lowell Post)
Appointed June 25, 2000, killed December 22, 2003, when a driver opened fire on him as he approached a disabled vehicle along Interstate 80 in Lake County.
